

## Waste Specific Assessment Criteria

Criteria	Status at OBC	Status at FBC	Are both stages the same? If not, why not?	P/F
<p><i>Recycling Standards</i></p> <p>What recycling/composting targets does the scheme aim to achieve in the short/medium and long term?</p>	<p>The reference project will meet the Waste Strategy 2000 targets and contribute towards longer term national targets for recycling. It will exceed local Best Value performance standards for recycling and support local recycling plans and implement the Shropshire Municipal Waste Management Strategy.</p>	<p>Consistent with the OBC but it is more expensive. Please see paragraph 1.5.</p> <p>In terms of recycling/composting however the project committed to achieving and exceeding national targets.</p>		
<p><i>Plans</i></p> <p>Does the scheme meet that set out in the MWMS?</p>	<p>There is no change from OBC to FBC and therefore remains as currently set out in 3.3.1.</p>			
<p><i>Landfill</i></p> <p>What targets does the scheme have for diversion from landfill and do they meet those set out by the EU landfill directive?</p>	<p>The project will meet the BMW landfill diversion targets set by the EU Landfill Directive.</p>	<p>There are significant improvements as set out in Table 3.9 and paragraph 3.6.2.</p>		
<p><i>Waste Min</i></p> <p>What waste min targets does the scheme aim to achieve in the short/medium and long term?</p>	<p>The Authority has demonstrated its commitment to waste minimisation. The reference project identifies the reduction in waste growth that it aims to deliver under the scheme. The contribution to be made by the scheme to waste minimisation is also detailed in the output</p>	<p>As per OBC and confirmed in 3.7.5.</p>		

## Waste Specific Assessment Criteria

Criteria	Status at OBC	Status at FBC	Are both stages the same? If not, why not?	P/F
	specification.			
<p><i>Credits</i></p> <p>What level of PFI credits is being applied for?</p>	SWP is seeking PFI Credits of £35.8m. The amount requested is within the current ceiling on PFI credits. The amount of credits assumes that the participating WCAs will no longer be eligible to receive Performance Award Grants.	Award increased by £5m to £40.8m.	See 3.6.2. and 3.6.3 in FBC.	
<b>Economic</b>				
LATS modelling			Both bidders guaranteed to deliver landfill diversion in excess of Shropshire's LATS allowance requirements as indicated in the OBC. Paragraph 1.5 of the FBC confirms this position.	
Affordability Position	At OBC stage it became clear that the Partnership would need to commit further significant resources if new and sustainable solutions were to be delivered.	Details of the options available following the increase in the level of PFI credit are set out in paragraph 6.4 1 – 4. The Authority expects therefore to deliver an affordable project.		
Risk Assessment			See Appendix K
