## APPENDIX C - PRUDENTIAL INDICATORS 2023/24

The Prudential Code requires the Council to set Prudential Indicators in the Treasury Strategy and report performance against those indicators in the Annual Treasury Report.

As can be seen from the table below, except for Indicator 1 and 6, all the indicators are below the targeted level set out in the Treasury Strategy for 2023/24. Prudential Indicator 1 relates to the ratio of financing costs compared to the net budget. Generally borrowing costs were in line with expected in the Treasury Strategy, but the additional MRP resulting from capitalised redundancies and transformation costs in 2023/24 increased the proportion realised. Prudential Indicator 6 relates to the expected level of borrowing for the financial year. As outlined earlier in the report it was agreed that new short term borrowing of £30m would be secured prior to the end of the financial year which has increased the level of borrowing more than the anticipated level. It should be noted though that this is below the authorised limit for external debt and within the operational boundary for external debt which are the key indicators to adhere to.

Prudential Indicators	2023/24	2023/24
	Indicator	Actual
1. Ratio of financing costs indicator		
Non-HRA	7.6%	12.4%
Non HRA (net of investment income)	6.5%	11.1%
HRA	38.1%	
2. Net Borrowing & Capital Financing		
Requirement (CFR)		
Non – HRA	£462m	£318m
HRA	£105m	£97m
