Appendix H.	Affordable Housing Sites Including Those Seeking Homes England (HE) Funding
Appendix I.	Windfall Sites
Appendix J.	Lapsed Permissions

1. Executive Summary

Introduction

- 1.1. The National Planning Policy Framework (NPPF) requires Local Authorities to identify and annually review their housing land supply. Generally, such an assessment is undertaken to consider whether there are sufficient deliverable sites within a Local Authority Area to allow for the provision of five years' worth of housing (plus an appropriate buffer, moved forward from later within the plan period, to allow for choice and competition in the market), based on the housing requirement set out in adopted strategic policies, or against local housing need where strategic policies are more than five years old, unless policies have been reviewed and found up-to-date¹.
- 1.2. However, the purpose of this assessment is to consider whether there are sufficient deliverable sites within Shropshire to allow for the provision of five years' worth of housing (plus an appropriate buffer, moved forward from later in the proposed plan period, to allow for choice and competition in the market), based on the proposed housing requirement within the strategic policies in the draft Shropshire Local Plan.
- 1.3. Please Note: A similar assessment based on the housing requirement set out in adopted strategic policies / local housing need has also been undertaken and is available on the Shropshire Council website.
- 1.4. This assessment covers the five year period from 2022/23 to 2026/27. The assessment has been undertaken using a cautious and robust methodology which is generally consistent with that endorsed by the Site Allocations and Management of Development (SAMDev Plan) Inspector within her Report on the SAMDev Plan (2015), whilst also reflecting recent changes to national policy and guidance.
- 1.5. In conclusion the assessment demonstrates that Shropshire Council currently has **6.52 years supply of deliverable housing land against the proposed housing requirement within strategic policies within the draft Shropshire Local Plan.**

Proposed Housing Land Requirement

- 1.6. Policy SP2. Strategic Approach of the draft Shropshire Local Plan identifies a proposed housing requirement of some 30,800 dwellings over the period from 2016 to 2038. This equates to around 1,400 dwellings per annum.
- 1.7. This proposed housing requirement has been informed by an assessment of local housing need (LHN) (2020 base date), using Government's standard methodology for calculating local housing need. This assessment of LHN indicated a housing need of some 25,894 dwellings, which equates to some 1,177 dwellings per annum. A report summarising this assessment is available on the Council's website at: <https://www.shropshire.gov.uk/media/20572/local-housing-need-assessment-2020-ev069.pdf>
- 1.8. Shropshire Council has also reviewed the LHN using a 2022 base date and the level of need is generally comparable to that within the 2020 base date assessment summarised within the above report (specifically it identifies a housing need of some 25,919 dwellings, which equates to some 1,178 dwellings per annum).
- 1.9. The proposed housing requirement for Shropshire of around 30,800 dwellings over the proposed plan period from 2016 to 2038 will meet local housing need and support the long-term sustainability of the County.

¹DLUHC (was HCLG), (2021), NPPF – Paragraph 74

- 1.10. It also provides some flexibility to respond to changes to LHN over the proposed plan period and an opportunity to:
- Respond positively to specific sustainable development opportunities;
 - Increase the delivery of family and affordable housing to meet the needs of local communities and support new families coming into Shropshire;
 - Support the delivery of specialist housing for older people, people with disabilities and the needs of other groups within the community;
 - Support the diversification of our labour force;
 - Support wider aspirations, including increased economic growth and productivity; and
 - Make an appropriate contribution to unmet housing need forecast to arise in the Black Country.

Housing Land Supply

- 1.11. Shropshire Council has undertaken a cautious and robust assessment of the housing land supply in Shropshire. This assessment concludes that deliverable dwellings in Shropshire are located on:
- Sites with extant Planning Permission at the 31st March 2022.
 - Sites with an extant and positive Prior Approval decision at the 31st March 2022.
 - Selected sites with a resolution to grant at the 31st March 2022.
 - Selected 'saved' site allocations within the adopted Local Plan which are likely to be deliverable within five years.
 - Selected sites proposed for allocation for development within the draft Shropshire Local Plan which are likely to be deliverable within five years.
 - Selected sites from the Strategic Land Availability Assessment (SLAA) which are likely to be deliverable within five years.
 - Affordable housing sites, including Homes England (HE) funded sites.
 - Windfall sites.
- 1.12. In order to be considered deliverable *"sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years"*.²
- 1.13. The methodology utilised for this assessment is summarised within the main report of this statement.

Proposed Housing Land Requirement and Supply Calculation

- 1.14. The proposed five year housing requirement, based on the proposed housing requirement within strategic policies within the draft Shropshire Local Plan, and housing supply for the five year period starting on the 1st April 2022 have been calculated using a methodology generally consistent with that endorsed by the SAMDev Plan Inspector within her Report, whilst also reflecting subsequent changes to national policy and guidance.

²DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

1.15. Table 1 provides a summary of the calculation of the proposed five year housing requirement:

Table 1: Summary of Proposed Five Year Housing Requirement

Category		Proposed Requirement – draft Shropshire Local Plan
(A) 5 Year Requirement:	2022/23	1,400
	2023/24	1,400
	2024/25	1,400
	2025/26	1,400
	2026/27	1,400
	Total	7,000
(B) Under-Delivery: (from earlier in the proposed plan period)		0
(C) Buffer: (10% buffer consisting of supply brought forward from later in the proposed plan period to ensure choice and competition. Applied to both the requirement and past under-delivery)		700
(D) Total Requirement (A) + (B) + (C):		7,700

1.16. Table 2 provides a summary of the housing land supply in Shropshire considered deliverable within the next five years, as at the 1st April 2022:

Table 2: Summary of deliverable housing land supply (as at 1st April 2022)

Category	Net Dwellings
(A) Dwellings on sites with Planning Permission*	6,134
(B) Dwellings on sites with Prior Approval*	103
(C) Selected sites with a 'resolution to grant'* Planning Permission	71
(D) Dwellings on 'saved' site allocations estimated to be completed within 5 years*	1,242
(E) Dwellings proposed for allocation within the Draft Shropshire Local Plan estimated to be completed within 5 years*	1,492
(F) SLAA Sites deliverable within 5 years*	100
(G) Emerging affordable housing sites*	304
(H) Windfall sites**	598
Total: (A) + (B) + (C) + (D) + (E) + (F) + (G) + (H)	10,044

*A very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; 'saved' site allocations within the adopted Local Plan; proposed allocation within the draft Local Plan; identified within the SLAA; and identified as an Emerging Affordable Housing Site will not be delivered in the five year period has been applied to figures in this table.

**Based on historic delivery rates and expected future trends.

Conclusion

- 1.17. Table 3 brings together the proposed five year housing land requirement and the results of the assessment of the five year housing land supply in Shropshire.
- 1.18. This table confirms that Shropshire Council is able to demonstrate a five year housing land supply as at the 1st April 2022.

Table 3: Comparison: Proposed Five Year Housing Requirement and Supply

Category	Proposed Requirement – draft Shropshire Local Plan
Total Requirement:	7,700
Total Supply:	10,044
Over / Under Provision:	2,344
Number of Years Supply:	6.52

- 1.19. Identifying land sufficient for the delivery of enough housing to meet the proposed housing requirement within strategic policies within the draft Shropshire Local Plan is one of the key responsibilities of Shropshire Council as the Local Planning Authority. Shropshire Council is in a position where it is able to demonstrate sufficient deliverable sites for **6.52 years supply of deliverable housing land against the proposed housing requirement within strategic policies within the draft Shropshire Local Plan**. The focus must therefore be on delivery of sustainable housing, which is ultimately a market function undertaken by the development industry.
- 1.20. Please Note: The sites which make up the various components of the five year housing land supply as at 31st March 2022 are included within Appendices A-I of the Shropshire Council: Five Year Housing Land Supply Statement – Draft Shropshire Local Plan (2022).

2. Introduction

- 2.1. The National Planning Policy Framework (NPPF) requires Local Authorities to identify and annually review their housing land supply. Generally, such an assessment is undertaken to consider whether there are sufficient deliverable sites within a Local Authority Area to allow for the provision of five years' worth of housing (plus an appropriate buffer, moved forward from later within the plan period, to allow for choice and competition in the market), based on the housing requirement set out in adopted strategic policies, or against local housing need where strategic policies are more than five years old, unless policies have been reviewed and found up-to-date³.
- 2.2. However, the purpose of this assessment is to consider whether there are sufficient deliverable sites within Shropshire to allow for the provision of five years' worth of housing (plus an appropriate buffer, moved forward from later within the proposed plan period, to allow for choice and competition in the market), based on the proposed housing requirement within the strategic policies in the draft Shropshire Local Plan.
- 2.3. Please Note: A similar assessment based on the housing requirement set out in adopted strategic policies / local housing need has also been undertaken and is available on the Shropshire Council website.
- 2.4. This assessment draws on information provided within the assessment of the housing land supply based on the housing requirement set out in adopted strategic policies / local housing need and material provided within the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan, including delivery timescales for proposed site allocations.
- 2.5. Identifying land sufficient for the delivery of enough housing to meet the housing requirement for the area is one of the key responsibilities of a Local Authority. However, delivery of sustainable housing development is ultimately undertaken by the development industry.
- 2.6. This statement sets out the assessment of housing land supply in Shropshire as at 1st April 2022 and has been undertaken using a cautious and robust methodology which is generally consistent with that endorsed by the Site Allocations and Management of Development (SAMDev Plan) Inspector within her Report⁴ on the SAMDev Plan (2015), whilst also reflecting recent changes to National policy and guidance. The five years covered within the assessment are 2022/23 to 2026/27.
- 2.7. The statement comprises six main components, these are the:
 - Proposed housing land requirement;
 - Housing delivery;
 - Housing land supply;
 - Proposed housing land requirement and supply calculation;
 - Housing land supply conclusion; and
 - Schedules of sites included within the housing land supply.
- 2.8. Within all aspects of this assessment, account has been taken of dwellings recorded as completed at the base date for the supply (31st March 2022) and residential units lost through any development scheme, to produce a net figure.

³DLUHC (was HCLG), (2021), NPPF – Paragraph 74

⁴www.shropshire.gov.uk/media/8232/samdev-plan-inspectors-report.pdf

- 2.9. In order to ensure that the appraisal of the deliverability / developability of the housing land supply is robust, a comprehensive methodology for the appraisal of sites has been utilised, further details of which are provided within this statement. **Ultimately this assessment represents a cautious appraisal and presents a robust position on the housing land supply in Shropshire.**
- 2.10. This assessment will be updated annually as further information becomes available regarding the delivery of housing sites.
- 2.11. In addition, further analysis of the information emerging from this review has been undertaken in order to provide:
- A review of the total housing land supply across the proposed plan period within the draft Shropshire Local Plan; and
 - A breakdown of the housing commitments and completions by settlement (with a proposed residential development guideline).
- 2.12. The results of this further analysis are provided as Annexes to this report.
- 2.13. **Please Note:** A separate assessment of Gypsy and Traveller accommodation (requirement and supply)⁵ has been undertaken and is available on the Shropshire Council website.

⁵Shropshire Gypsy and Traveller and Travelling Showperson Accommodation Assessment (2017), <https://shropshire.gov.uk/planning-policy/local-planning/local-plan-partial-review-2016-2036/evidence-base/>

3. Proposed Housing Land Requirement

Context

- 3.1. The NPPF states *“Local Planning Authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old”*⁶.
- 3.2. However, as already specified the purpose of this assessment is to consider whether there are sufficient deliverable sites within Shropshire to allow for the provision of five years’ worth of housing (plus an appropriate buffer, moved forward from later within the proposed plan period, to allow for choice and competition in the market), based on the proposed housing requirement within the draft Shropshire Local Plan.
- 3.3. Please Note: A similar assessment based on the housing requirement set out in adopted strategic policies / local housing need has also been undertaken and is available on the Shropshire Council website.

Identification of the Proposed Housing Land Requirement

- 3.4. Policy SP2. Strategic Approach of the draft Shropshire Local Plan identifies a proposed housing requirement of some 30,800 dwellings over the period from 2016 to 2038. This equates to around 1,400 dwellings per annum.
- 3.5. This proposed housing requirement has been informed by an assessment of local housing need (LHN) (2020 base date), using Government’s standard methodology for calculating local housing need. This assessment of LHN indicated a housing need of some 25,894 dwellings, which equates to some 1,177 dwellings per annum.
- 3.6. Shropshire Council has also reviewed the LHN using a 2022 base date and the level of need is generally comparable to that within the 2020 base date assessment summarised within the above report (specifically it identifies a housing need of some 25,919 dwellings, which equates to some 1,178 dwellings per annum).
- 3.7. The proposed housing requirement for Shropshire of around 30,800 dwellings over the proposed plan period from 2016 to 2038 will meet local housing need and support the long-term sustainability of the County. It also provides some flexibility to respond to changes to LHN over the proposed plan period and an opportunity to:
 - a. Respond positively to specific sustainable development opportunities;
 - b. Increase the delivery of family and affordable housing to meet the needs of local communities and support new families coming into Shropshire;
 - c. Support the delivery of specialist housing for older people, people with disabilities and the needs of other groups within the community;
 - d. Support the diversification of our labour force;
 - e. Support wider aspirations, including increased economic growth and productivity; and
 - f. Make an appropriate contribution to unmet need arising in the Black Country.

⁶DLUHC (was HCLG), (2021), NPPF – Paragraph 74

Identification of the Proposed Annual Housing Land Requirement

- 3.8. Policy SP2. Strategic Approach of the draft Shropshire Local Plan identifies a proposed housing requirement of some 30,800 dwellings over the period from 2016 to 2038. This equates to around 1,400 dwellings per annum.
- 3.9. Having reflected on the various components of the housing land supply and best available information regarding likely timescales for their delivery, past rates of delivery, past trends within the market, known factors which may influence the housing market and housing delivery rates in the short to medium term and the myriad of other factors which are unknown and may influence the housing market and housing delivery rates in the short, medium and long-term, the expected rate of housing delivery over the proposed plan period is around 1,400 dwelling per annum, which is consistent with the annual housing requirement. Whilst it is acknowledged that there will inevitably be fluctuations over time, which may result in annual rates of delivery falling below or exceeding this level, it is expected that this will 'balance out' to ensure that the housing requirement is achieved.
- 3.10. As such, the draft Shropshire Local Plan proposes an annual housing land requirement of some 1,400 dwellings per annum.

4. Housing Delivery

Annual Housing Completions

- 4.1. Using the proposed annual housing requirement identified within Policy SP2. Strategic Approach of the draft Shropshire Local Plan, Shropshire Council has undertaken a review of annual housing completions within previous years of the proposed plan period. The results of this review are summarised in Table 4.

Table 4: Housing Completions in Shropshire (2016/17 - 2020/21)

Financial Year	Annual Requirement	Housing Completions	Over provision / shortfall	Cumulative provision
2016/17	1,400	1,910	510	510
2017/18	1,400	1,876	476	986
2018/19	1,400	1,843	443	1,429
2019/20	1,400	1,554	154	1,583
2020/21	1,400	1,586	186	1,769
2021/22	1,400	1,485	85	1,854

Past Over/Under-Delivery

- 4.2. Annual housing completions since the start of the proposed plan period of 2016/17 have consistently exceeded the proposed annual housing requirement, reflecting market conditions and the benefits of an up-to-date Local Plan. It is considered that the draft Shropshire Local Plan can have a similar positive effect in maintaining housing completions at a level that achieves the proposed housing requirement of 1,400 dwellings per annum.
- 4.3. Figure 1 illustrates the annual housing completions thus far within the proposed plan period and the proposed annual housing requirement over the proposed plan period with the draft Shropshire Local Plan.

Figure 1: Housing Completions and Proposed Housing Requirement in Shropshire (2016/17 - 2037/38)

Housing Delivery Test

- 4.4. The NPPF states *“To maintain the supply of housing, local planning authorities should monitor progress in building out sites which have permission. Where the Housing Delivery Test indicates that delivery has fallen below 95% of the local planning authority’s housing requirement over the previous three years, the authority should prepare an action plan in line with national planning guidance, to assess the causes of under delivery and identify actions to increase delivery in future years”*.⁷
- 4.5. Government has published guidance on the housing delivery test, including a measurement rule book, which explains how it is calculated.
- 4.6. In summary, the housing delivery test is *“a percentage measurement of the number of net homes delivered against the number of homes required, as set out in the relevant strategic policies for the areas covered by the Housing Delivery Test, over a rolling three year period”*⁸. The calculation can therefore be summarised as follows:

$$\text{Housing Delivery Test (\%)} = \frac{\text{Total net homes delivered over three year period}}{\text{Total number of homes required over three year period}}$$

- 4.7. The guidance then goes on to identify the method for calculating homes delivered and required. In summary:
- *“The number of net homes delivered is the National Statistic for net additional dwellings over a rolling three year period, with adjustments for net student and net other communal accommodation”*⁸.
 - The number of homes required is the lower of:
 - *“the latest adopted housing requirement, including any unmet need from neighbouring authorities which forms part of that adopted housing requirement. This requirement will be the stepped housing requirement (or the annual average requirement where there is no stepped requirement)”*⁸, where the housing requirement is less than five years old; **or**
 - *“the minimum annual local housing need figure (and any need from neighbouring authorities which it has been agreed should be planned for, and which has been tested at examination) for that authority calculated with a base date of 1st April each year”*⁸.
- 4.8. The most recent Housing Delivery Test measurement is that for 2021, which was published on the 14th January 2022.
- 4.9. This 2021 measurement indicated that within Shropshire, over the relevant three years (2018/19, 2019/20 and 2020/21) housing delivery exceeded housing required, with delivery at 158%⁹.
- 4.10. This calculation undertaken can be summarised as follows:

$$\text{Housing Delivery Test} = \frac{\text{Total net homes delivered over three year period (4,971)}}{\text{Total number of homes required over three year period (3,156)}} \quad (158\%)$$

- 4.11. Please Note: Within this measurement, the housing completions figure for the 2019/20 period has been updated to reflect updated housing completion data provided by Shropshire Council. However, this update has not included the

⁷DLUHC (was HCLG), (2021), NPPF – Paragraph 76

⁸DLUHC (was HCLG), (2018), Housing Delivery Test Measurement Rule Book

⁹DLUHC (was HCLG), (2020), Housing Delivery Test: 2019 measurement

completed communal accommodation (equating to 12 net dwellings, using the methodology within the Housing Delivery Test Measurement Rulebook). This does not result in a significant change to the results of the measurement.

- 4.12. If the proposed housing requirement within the draft Shropshire Local Plan were used to calculate the Housing Delivery Test, over the last three years (2019/20, 2020/21 and 2021/22) housing delivery exceeded housing required, with delivery at 110%.

$$\text{Housing Delivery Test} = \frac{\text{Total net homes delivered over three year period (4,625)}}{\text{Total number of homes required over three year period (4,200)}} \times 100\%$$

Housing Buffer

- 4.13. The NPPF specifies that when assessing the five year housing land supply, Local Authorities should *“identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*
- a) 5% to ensure choice and competition in the market for land; or*
 - b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or*
 - c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply”¹⁰.*
- 4.14. The NPPF indicates that significant under delivery of housing will be *“measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement”¹¹.*
- 4.15. The Housing Delivery Test indicates that within Shropshire, housing completions over the last three years have exceeded housing required, as such a 5% buffer would ordinarily be applicable.
- 4.16. However, the purpose of this assessment is to consider whether there are sufficient deliverable sites within Shropshire to allow for the provision of five years’ worth of housing (plus an appropriate buffer, moved forward from later within the proposed plan period, to allow for choice and competition in the market), based on the proposed housing requirement within the draft Shropshire Local Plan. As such to ensure robustness of this assessment a 10% buffer will be applied.

¹¹DLUHC (was HCLG), (2021), NPPF – Footnote 41

5. Housing Land Supply

Introduction

- 5.1. Shropshire Council has undertaken a cautious and robust assessment of the housing land supply in Shropshire. This part of the statement identifies the methodological approach utilised during this assessment.

Definition of a Dwelling

- 5.2. In order to undertake an assessment of housing land supply, a definition of a dwelling must be identified. This ensures consistency and robustness of the assessment.
- 5.3. Shropshire Council considers that the most appropriate definition of a dwelling for the purposes of an assessment of housing land supply is that provided by the Office for National Statistics (ONS), as it is data collected by the ONS that underpins the assessment of Housing Need, informing the subsequent Housing Requirement.
- 5.4. This definition has also been endorsed by the Department for Housing, Communities and Local Government (HCLG), the department responsible for producing the NPPF and NPPG. The NPPF and NPPG identify the requirement for Local Authorities to undertake an annual assessment of housing land supply and outline the parameters for such an assessment.
- 5.5. Furthermore, the definition is consistent with that applied when determining whether a unit would generate an award under the New Homes Bonus and whether it should be subject to Council Tax.
- 5.6. This definition of a dwelling is as follows: *“a self-contained unit of accommodation. Self-containment is where all the rooms (including kitchen, bathroom and toilet) in a household’s accommodation are behind a single door which only that household can use. Non-self-contained household spaces at the same address should be contained together as a single dwelling. Therefore a dwelling can consist of one self-contained household space or two or more non-self-contained household spaces at the same address”*¹².

Specialist Housing

- 5.7. The term 'specialist housing' can be applied to a range of accommodation types intended to meet the needs of those who need assistance (primarily but not necessarily the elderly). The NPPG on housing for older and disabled people explains that there is *“a significant amount of variability in the types of specialist housing for older people”*¹³. It also provides an indicative list and summary of the categories of specialist housing available. These are:

“Age-restricted general market housing: *This type of housing is generally for people aged 55 and over and the active elderly. It may include some shared amenities such as communal gardens, but does not include support or care services.*

Retirement living or sheltered housing: *This usually consists of purpose-built flats or bungalows with limited communal facilities such as a lounge, laundry room and guest room. It does not generally provide care services, but provides some*

¹²DLUHC (was HCLG), (2020), Housing Flow Reconciliation, https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/905338/Housing_Flow_s_Reconciliation_guidance.pdf

¹³DLUHC (was HCLG), (2019), NPPG – Housing for Older and Disabled People, Paragraph: 010 Reference ID: 63-010-20190626, Revision date: 26 June 2019

support to enable residents to live independently. This can include 24 hour on-site assistance (alarm) and a warden or house manager.

Extra care housing or housing-with-care: This usually consists of purpose-built or adapted flats or bungalows with a medium to high level of care available if required, through an onsite care agency registered through the Care Quality Commission (CQC). Residents are able to live independently with 24 hour access to support services and staff, and meals are also available. There are often extensive communal areas, such as space to socialise or a wellbeing centre. In some cases, these developments are known as retirement communities or villages - the intention is for residents to benefit from varying levels of care as time progresses.

Residential care homes and nursing homes: These have individual rooms within a residential building and provide a high level of care meeting all activities of daily living. They do not usually include support services for independent living. This type of housing can also include dementia care homes.”¹⁴

- 5.8. When grouped together such specialist housing is often termed 'continuing care retirement communities' or 'retirement villages'.

Specialist Housing: Self-Contained Dwellings

- 5.9. The use-class of specialist housing is often the topic of considerable debate. Specialist housing has in different circumstances been categorised use-class C3, C2, or sui-generis. Ultimately all these forms of specialist housing are considered a form of dwelling/housing, as is apparent throughout the references to it within both NPPF and NPPG (including the NPPG on housing for older and disabled people).
- 5.10. The use-class assigned to specialist housing is therefore not necessarily a reflection of the type of accommodation provided, being strongly influenced by the level of care and community facilities available. Indeed, the NPPG on housing for older and disabled people specifies that “*When determining whether a development for specialist housing for older people falls within C2 (Residential Institutions) or C3 (Dwellinghouse) of the Use Classes Order, consideration could, for example, be given to the level of care and scale of communal facilities provided.*”¹⁵
- 5.11. Shropshire Council considers that it is most appropriate to apply the ONS and HCLG definition of a dwelling when determining if these units of accommodation are dwellings.
- 5.12. Where the units comply with this definition (are self-contained, with their own living space, bedroom, bathroom and kitchen behind their own front door) then they are considered to represent a dwelling(s) for the purpose of this assessment of housing land supply.
- 5.13. The SAMDev Plan Inspector has endorsed the approach taken by Shropshire Council in relation to these units, stating within Paragraph 49 of her report that “*It is reasonable to include care home accommodation within the 5 year housing land supply where it is in the form of self-contained units. Shropshire Council has been very cautious in its consideration of which extra care/care home facilities can be included within the supply, giving consideration to the details of a particular scheme rather than simply the description of development which may be misleading*”¹⁶.

¹⁴DLUHC (was HCLG), (2019), NPPG – Housing for Older and Disabled People, Paragraph: 010 Reference ID: 63-010-20190626, Revision date: 26 June 2019

¹⁵DLUHC (was HCLG), (2019), NPPG – Housing for Older and Disabled People, Paragraph: 014 Reference ID: 63-014-20190626, Revision date: 26 June 2019

¹⁶PINS (2015), Report on the Examination into Site Allocations and Management of Development (SAMDev) Plan, <https://shropshire.gov.uk/media/8232/samdev-plan-inspectors-report.pdf>

Specialist Housing: Communal Accommodation

- 5.14. Where specialist housing does not constitute a self-contained dwelling, it is considered to represent communal accommodation. In the past, Shropshire Council did not include such communal accommodation within its housing land supply.
- 5.15. However, in 2018 Shropshire Council commenced consideration of such communal accommodation for the elderly within its housing land supply. This is to reflect guidance within the NPPG on Housing Supply and Delivery, which specifies that *“Local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, as part of their housing land supply. This contribution is based on the amount of accommodation released in the housing market”*¹⁷.
- 5.16. The NPPG on Housing for Older and Disabled People specifies how such accommodation should be accounted for within the housing land supply, stating: *“plan-making authorities will need to count housing provided for older people against their housing requirement. For residential institutions, to establish the amount of accommodation released in the housing market, authorities should base calculations on the average number of adults living in households, using the published Census data”*¹⁸.
- 5.17. Currently the average number of adults living in all households is 1.8. As such the calculation of the contribution of completed communal accommodation to total housing supply would be as follows:

$$\frac{\text{“Net bedrooms in communal accommodation”}}{\text{Average number of adults in households in England (currently 1.8)}}$$
¹⁹

- 5.18. For consistency, the NPPG on Housing Supply and Delivery also specifies that *“Communal accommodation, including student accommodation and other communal accommodation, can count towards the Housing Delivery Test...”*²⁰.
- 5.19. Shropshire Council commenced monitoring consents/completions on other communal accommodation for the elderly from the 2018/19 monitoring period. The contribution that such properties make to the housing completions and housing land supply have been calculated consistent with the NPPG.

Student Accommodation

- 5.20. The NPPG on Housing Supply and Delivery states *“All student accommodation, whether it consists of communal halls of residence or self-contained dwellings, and whether or not it is on campus, can in principle count towards contributing to an authority’s housing land supply based on:*
- *The amount of accommodation that new student housing releases in the wider housing market (by allowing existing properties to return to general residential use); and / or*
 - *The extent to which it allows general market housing to remain in such use, rather than being converted for use as student accommodation.*
- 5.21. *This will need to be applied to both communal establishments and to multi bedroom self-contained student flats. Several units of purpose-built student accommodation*

¹⁷DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 035 Reference ID: 68-035-20190722, Revision date: 22 July 2019

¹⁸DLUHC (was HCLG), (2019), NPPG – Housing for Older and Disabled People, Paragraph: 016a Reference ID: 63-016a-20190626, Revision date: 26 June 2019

¹⁹DLUHC (was HCLG), (2018), Housing Delivery Test Measurement Rule Book

²⁰DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 041 Reference ID: 68-041-20190722, Revision date: 22 July 2019

may be needed to replace a house which may have accommodated several students.

- 5.22. Authorities will need to base their calculations on the average number of students living in student only accommodation, using the published census data, and take steps to avoid double-counting. The exception to this approach is studio flats designed for students, graduates or young professionals, which can be counted on a one for one basis. A studio flat is a one-room apartment with kitchen facilities and a separate bathroom that fully functions as an independent dwelling”²¹.
- 5.23. Currently the average number of students in student only households is 2.5. As such the calculation of the contribution of completed communal accommodation to total housing supply would be as follows:

Net bedrooms in student communal accommodation

Average number of students in student only households in England (currently 2.5)²²

- 5.24. For consistency, the NPPG on Housing Supply and Delivery also specifies that “Communal accommodation, including student accommodation and other communal accommodation, can count towards the Housing Delivery Test...”²³.
- 5.25. This approach has been applied to student accommodation within the housing land supply from the 2017/18 monitoring period. The contribution that such properties make to the housing completions and housing land supply have been calculated consistent with the NPPG.

Annexes

- 5.26. In conformity with the ONS and HCLG definition of a dwelling, Shropshire Council considers that annexes represent self-contained dwellings where they:
- Are self-contained (have their own living space, bedroom, bathroom and kitchen);
 - Have their own point of access; and
 - Are not subject to conditions on occupancy, that restrict a self-contained household from being formed within them²⁴.
- 5.27. Consequently, where annexes comply with these criteria, they will be considered as part of the review of the housing land supply.

Deliverable and Developable Sites

- 5.28. When reviewing the housing land supply, Shropshire Council is required to undertake an assessment of sites to determine if they are deliverable, developable or not currently developable for housing. This will then inform the consideration of when the site is likely to come forward for development.
- 5.29. Sites to be included within the first five years of the housing land supply should be considered deliverable. The NPPF states that “*To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years.*”

²¹DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 034 Reference ID: 68-034-20190722, Revision date: 22 July 2019

²²DLUHC (was HCLG), (2018), Housing Delivery Test Measurement Rule Book

²³DLUHC (was HCLG), (2019), NPPG – Housing Supply and Delivery, Paragraph: 041 Reference ID: 68-041-20190722, Revision date: 22 July 2019

²⁴DLUHC (was HCLG), (2020), Housing Flow Reconciliation,

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/905338/Housing_Flow_s_Reconciliation_guidance.pdf

In particular:

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”²⁵.

- 5.30. It is apparent that this is not intended to be an exhaustive list of the types of site which can be considered deliverable and that sites do not need to involve non-major development and have Planning Permission or have detailed Planning Permission to be included within the first five years of the housing land supply. Rather the requirement is that there is clear evidence, through assessment of a site, that concludes that it is **available now**; offers a **suitable location for development now**; and is **achievable** with a realistic prospect that **housing will be delivered** within five years.
- 5.31. Sites can be included within the housing land supply beyond the first five years where they are considered developable. For a site to be considered developable the NPPF requires that “*sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged*”²⁵.
- 5.32. For the purposes of this statement deliverable and developable dwellings are on:
- Sites with extant Planning Permission at the 31st March 2022.
 - Sites with an extant and positive Prior Approval decision at the 31st March 2022.
 - Selected sites with a resolution to grant at the 31st March 2022.
 - Selected ‘saved’ site allocations within the adopted Local Plan which are likely to be deliverable within five years or developable beyond the next five years.
 - Selected sites proposed for allocation for development within the draft Shropshire Local Plan which are likely to be deliverable within five years or developable beyond the next five years.
 - Selected sites from the Strategic Land Availability Assessment (SLAA) which are likely to be deliverable within five years or developable beyond the next five years.
 - Affordable housing sites including Homes England (HE) funded sites.
 - Windfall sites.

Build Rates and Lead-in Times

- 5.33. When reviewing housing land supply, Shropshire Council must also make assumptions about both lead-in times and build rates on development sites.

²⁵DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

Lead-in Times

- 5.34. Lead-in time represents the period of time before construction starts on a site. There are a range of factors that will dictate lead-in times, however to ensure consistency in its assessment, Shropshire Council has identified very cautious standard assumptions on lead-in times, which reflects the broad range of applications received.
- 5.35. The Council's assumptions on lead-in times assume a period of between 10-27 months from the preparation of an application to the completion of the first dwelling on a site. This reflects the significant range of applications the Council receives, which in turn reflects the varied nature of the County. This includes a significant volume of applications on small sites which will usually be subject to less pre-application discussion and negotiation on Section 106 Legal Agreements, through to larger schemes, mixed use proposals and urban extensions in Shrewsbury (the Strategic Centre); the Principal Centres; and Key Centres. It is considered that the assumptions made by the Council on lead-in times are both realistic and locally reflective.
- 5.36. Table 5 summarises the Council's lead-in time assumptions:

Table 5: 'Standard' Lead-in Times in Shropshire

Action	Months as a range		
Preparation of Application	1	6	8-21
Local Planning Authority Consideration of Application	2	3	
Completion of S.106 Legal Agreement	1	6	
Preparation of Reserved Matters Application (if applicable) & Discharging of Conditions	2	3	
Local Planning Authority Consideration of Reserved Matters Application(s) (if applicable)	2	3	
Site Mobilisation	2	6	2-6
Infrastructure Implementation			
Build First Dwelling			
Totals:	10	27	10-27

- 5.37. Development occurring on larger sites in Shropshire is more than capable of commencement within six months following the grant of approval, with examples provided below. This is not surprising considering many larger sites are Local Plan allocations and benefit from significant amounts of design work, site marketing and discussions with the Council prior to the submission of an application.
- 5.38. For instance:
- 13/03055/FUL Land at Aston Street, Shifnal (115 dwellings): Decision notice issued on 24th March 2014. Commencement on 7th April 2014. Development completed during 2017/18.
 - 13/00893/FUL Phase 1 of the Shrewsbury South SUE (291 dwellings): Decision notice issued on 9th May 2014. Commencement on 27th May 2014. As at the 31st March 21, 283 dwellings have been completed on this site.
 - 14/01264/FUL Mount Farm, Whitchurch (100 dwellings): Decision notice issued on 23rd December 2014. Commencement on 23rd March 2015. Development completed during 2018/19.

- 14/05343/FUL Land West of Ellesmere Road, Shrewsbury (147 dwellings): Decision notice issued on 26th March 2015. Commencement on 15th June 2015. Development completed during 2018/19.
- 16/02618/FUL Phase 3 of the Shrewsbury South SUE (159 dwellings): Decision notice issued on 19th December 2016. Commencement on 16th January 2017. Development completed during 2019/20.
- 16/05474/FUL Land East of A53, Shrewsbury Road, Shawbury (50 dwellings): Decision notice issued 4th October 2017. Commencement on 21st October 2017. Development completed during 2019/20.
- 17/05554/FUL Land to the North of Hall Bank, Pontesbury (86 dwellings): Decision notice issued 10th September 2018. Commencement on 17th September 2018. Development completed during 2021/22
- 21/01748/FUL Land to North of Oteley Road, Shrewsbury (66 bedroom care home): Decision notice issued 9th August 2021. Commencement on 6th October 2021. Development completed post 2021/22.
- 20/01957/FUL Land at Churncote, Off Welshpool Road, Shrewsbury (340 dwellings): Decision notice issues 1st March 2022. Commencement on 3rd March 2022. Development progressing at pace.

- 5.39. These assumptions represent a cautious assessment of the timescales taken to undertake key stages in the development process such as preparing for and undertaking pre-application discussions; carrying out supporting investigations and surveys; securing Planning Permission; completing Section 106 Legal Agreements; discharging pre-commencement conditions; and undertaking pre-construction works.
- 5.40. Where possible, to increase accuracy of assumptions on lead-in times, they have been further refined through discussions with landowners, land promoters and developers which ensure that Shropshire Council can have significant confidence that the assumptions for each site are realistic.

Build Rates

- 5.41. Build rates represent the number of dwellings that it is anticipated will be completed on a site, per-annum. Similar to lead-in times, there are a range of factors that will dictate build rates.
- 5.42. To ensure consistency Shropshire Council has identified 'standard' build rates, based on its own monitoring of development activity and feedback from the Shropshire Council Developer Panel (consisting of representatives of the various scales of the development industry operating in Shropshire), which indicated that build rates on sites in Shropshire are around 30-40 units/year. It is the experience of many local developers that, "the right site sells well" in Shropshire.
- 5.43. Further feedback from the Panel has also indicated that on large sites (benchmark estimate of 250 dwellings plus) that the build-out rate could be multiplied to take into consideration that two or more developers may be constructing housing units at the same time.

5.44. These 'standard' build rates are summarised in the Table 6 below:

Table 6: 'Standard' Build Rates in Shropshire

Location of Development	Anticipated Build Rate*
North Shropshire	25 dwellings/year
Central Shropshire	38 dwellings/year
South Shropshire	36 dwellings/year

*Sites of more than 250 dwellings will be subject to a large site multiplier

5.45. It is considered that these build rates represent a fair and reasonable reflection of the local market.

5.46. However, where possible, to further increase accuracy of assumptions on build rates, proactive discussions were undertaken with landowners, land promoters and developers regarding build-rates on specific sites, to ensure that Shropshire Council can have significant confidence that the assumptions for build rates are realistic.

Sites with Planning Permission as at 31st March 2022 (Appendices A and B)

5.47. The NPPF states that: *"To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

*b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years"*²⁶.

5.48. Consistent with the NPPF, Shropshire Council considers that the majority of sites with an extant Planning Permission can be considered deliverable and are therefore suitable for inclusion within the first five years of the housing land supply. Where the extant Planning Permission is an outline consent for major development, the sites deliverability has been documented within Appendix B of this document.

5.49. To ensure the robustness of this assessment of housing land supply, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission will not be delivered in the five year period. This is an approach utilised by many Local Planning Authorities; is in line with standard industry practice; and was endorsed by the SAMDev Plan Inspector within her report.

5.50. Ultimately there is no mandatory requirement for a non-delivery rate to be applied to sites with Planning Permission within the housing land supply. Shropshire Council considers that the use of a consistent assumption that 10% of deliverable dwellings on sites with Planning Permission will not be delivered in the five year period is appropriate and represents a robust approach to variations in the market and other

²⁶DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

factors that might inhibit development and ensures a comprehensive and consistent assessment of housing land supply.

- 5.51. Shropshire Council recognises that some sites will take longer than five years to build out, therefore the number of dwellings expected to be completed annually on deliverable land has been informed by the 'standard' assumptions on lead-in times and build rates – refined through proactive discussions with landowners, land promoters and developers where possible. Where development of a site is expected to take more than five years to complete, only the equivalent part of the site is included within the first five years of the housing land supply.
- 5.52. These sites are identified within Appendix A and B of this document.

Sites with a Prior Approval decision as at 31st March 2022 (Appendix C)

- 5.53. Sites with Prior Approval are comparable to sites with detailed Planning Permission.
- 5.54. As such, similar to sites with Planning Permission, Shropshire Council considers that the majority of sites with an extant Prior Approval decision (where the decision is that either Prior Approval is not required or is approved) can be considered deliverable and are therefore suitable for inclusion within the first five years of the housing land supply.
- 5.55. This is consistent with Governments stated intention when they introduced amendments to Permitted Development Rights, for example: *“under new Class MB agricultural buildings will be able to change to up to three dwelling houses (C3), and carry out associated building works, so that rural businesses can diversify **while increasing housing supply**”²⁷* (my emphasis).
- 5.56. Another example is: *“Permitted development rights have an important role to play in the planning system. They provide a more streamlined planning process with greater planning certainty, while at the same time allowing for local consideration of key planning matters through a light-touch prior approval process. Permitted development rights can incentivise certain forms of development by providing developers with a greater level of certainty, within specific planning controls and limitations. Individual rights provide for a wide range of development and include measures to **incentivise and speed up housing delivery**.”²⁸* (my emphasis).
- 5.57. However, similar to sites with Planning Permission, it is recognised that a small proportion of sites with a Prior Approval decision (where the decision is that either Prior Approval is not required or is approved) that are considered deliverable may not be delivered in the five year period. With this consideration in mind and to ensure the robustness of this assessment, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on sites with Prior Approval will not be delivered in the five year period.
- 5.58. These sites are identified within Appendix C of this document.

Sites with a ‘resolution to grant’ as at 31st March 2022 (Appendices D)

- 5.59. In some cases, Shropshire Council has ‘resolved to grant’ Planning Permission on a site, subject to the signing of a S106 Legal Agreement. Selected sites with a ‘resolution to grant’ Planning Permission have been included in the housing supply,

²⁷Explanatory Memorandum to the Town and Country Planning (General Permitted Development (Amendment and Consequential Provisions) (England) Order 2014

²⁸Explanatory Memorandum to the Town and Country Planning (General Permitted Development ETC.) (England) (Amendment) Order 2021

as they are considered to be deliverable (as demonstrated by the fact that they have sufficiently progressed to the point where a Planning Application has been submitted and a 'resolution to grant' the Planning Application has been reached).

- 5.60. When considering the deliverability of sites with a 'resolution to grant', Shropshire Council has exercised caution in order to ensure that its assessment of the housing land supply is robust. Therefore, sites have only been considered deliverable where they comply with one or more of the following criteria:
- The site subject to the Planning Application is an adopted Local Plan site.
 - The site subject to the Planning Application is located within a settlement development boundary and the settlement has been identified as a suitable location for infill/windfall development within the SAMDev Plan (2015).
 - The site subject to the Planning Application is for affordable housing, rural workers housing or an agricultural workers dwelling.
 - The site subject to the Planning Application is for the conversion of an existing building, such as a barn.
 - The site subject to the Planning Application is for the redevelopment of a select number of sustainable brownfield sites.
 - The site subject to the Planning Application had a resolution to grant subject to completion of a S106 Legal Agreement at the 31st March 2022 and has subsequently been approved.
- 5.61. Furthermore, for consistency, where the 'resolution to grant' relates to outline consent for major development, the sites deliverability has been further documented.
- 5.62. However, despite this robust approach to filtering Planning Applications with a 'resolution to grant', it is recognised that not all dwellings on sites with a 'resolution to grant' Planning Permission that are considered deliverable will eventually have a successfully signed S106 Legal Agreement and be implemented within the five year period. Consequently, Shropshire Council has again applied a very cautious assumption that 10% of deliverable dwellings on sites with a 'resolution to grant' Planning Permission will not be delivered in the five year period.
- 5.63. **It should be stressed, of course, that inclusion of a Planning Application with a 'resolution to grant' within this assessment of Housing Land Supply is without prejudice to the Local Plan process or completion of the S106 Legal Agreement and final Planning Application decision.**
- 5.64. These sites are identified within Appendix D of this document.

'Saved' allocations within the adopted Local Plan (Appendix E)

- 5.65. Within Shropshire, strategic locations for development were identified in the adopted Core Strategy (2011) and sites were subsequently allocated for development within the adopted SAMDev Plan (2015). It is proposed that a number of these allocations are 'saved' to support the achievement of the proposed housing requirement within the draft Shropshire Local Plan.
- 5.66. Further information on these two documents is available in Chapter 3: Housing Land Requirement.

Sustainable Urban Extensions (SUE's)

5.67. The Core Strategy (2011) identifies Sustainable Urban Extensions (SUE's) in Shrewsbury and Oswestry (Core Strategy (2011) Policies CS2 and CS3 respectively) as strategic locations for growth. These SUE's are summarised in Table 7:

Table 7: Shropshire Sustainable Urban Extensions

Location	Name	Status
Shrewsbury	Shrewsbury South SUE	<p>Overview:</p> <ul style="list-style-type: none"> • Masterplan prepared for the site and adopted by Shropshire Council. • Site to be the subject of a comprehensive development in accordance with the adopted masterplan, to include approximately 950 dwellings, employment land and related infrastructure. • Infrastructure costs and contributions agreed, with main landowners (including Shropshire Council) working collaboratively towards delivery. • Development to be brought forward in coordinated phases. <p>Residential Phase 1 of the Shrewsbury South SUE:</p> <ul style="list-style-type: none"> • Full Planning Permission (13/00893/FUL) granted in May 2014 for 291 dwellings (majority of phase 1), with development also commencing in May 2014. Development now near completion. • Full Planning Permission (21/01748/FUL) granted for a 66 bedroom care home in August 2021 (remainder of phase 1), with development commencing in October 2021. Development was completed post 31st March 2022. <p>Residential Phase 2 of the Shrewsbury South SUE:</p> <p>Outline Planning Permission (14/04428/OUT) granted for up to 550 dwellings and a 70 bed care home (entirety of phase 2) in June 2015.</p> <p>-A series of Reserved Matters Permissions for engineering works; construction of the access road; and the location of the attenuation ponds were granted in March; May; and September 2016. Engineering works subsequently commenced; the balancing pond formed; and multiple points of access to the site established.</p> <p>-Reserved Matters Permission (17/06149/REM) granted in April 2018 for 164 dwellings and development of these dwellings has commenced.</p> <p>-Reserved Matters Permission (19/00048/REM) granted in April 2019 for 49 dwellings and development of these dwellings has been completed.</p> <p>-Reserved Matters Permission (19/04460/REM) granted in March 2020 for 175 dwellings and development of these dwellings has commenced.</p> <p>-Reserved Matters Permission (19/05470/REM) granted in April 2020 for 162 dwellings and development of these dwellings has commenced.</p> <ul style="list-style-type: none"> • Alternative Outline Planning Permission (21/02982/OUT) subsequently granted replacing the proposed 70 bedroom Care Home with 35 dwellings (the remaining residential component subject to Outline Planning Permission 14/04428/OUT). -A Reserved Matters Permission (22/01867/REM) was subsequently granted for this development post 31st March 2022. <p>Residential Phase 3 of the Shrewsbury South SUE:</p> <ul style="list-style-type: none"> • Full Planning Permission (16/02618/FUL) for 159 dwellings (entirety of phase 3) was approved in December 2016. Development is completed. <p>Wider Development:</p> <ul style="list-style-type: none"> • Hybrid Planning Permission (18/04194/FUL) granted on part of the local centre phase 1 site for a food store and specialist housing for older people (Outline Permission applies to the care home and extra-care apartments). -The food store has been built out. -Reserved Matters Permission (19/04101/REM) subsequently granted for 80 bed Care Home, development of which was completed post 31st March 2022.

Location	Name	Status
		<p>-The 57 extra-care apartments have now lapsed, but Shropshire Council understands that there remains developer interest and an intention to bring forward this form of development on the site. Shropshire Council considers that there is clear evidence that this component of site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.</p> <ul style="list-style-type: none"> • Other development including a garden centre and other retail units have been approved and completed. <p>General:</p> <ul style="list-style-type: none"> • There are now numerous outlets operating across Shrewsbury South SUE and development is progressing at pace. However, Shropshire Council have continued to apply very cautious assumptions regarding lead-in times and delivery rates. As such, forecasted completion rates for this site are very likely to be overly cautious.
Shrewsbury	Shrewsbury West SUE	<p>Overview:</p> <ul style="list-style-type: none"> • Masterplan prepared for the site and adopted by Shropshire Council. • Site to be the subject of a comprehensive development in accordance with the adopted masterplan, to include approximately 750 dwellings, employment, the provision of new Oxon Link Road, and other infrastructure. • The site is a sustainable urban extension, as such it is very large, in multiple ownerships and requires complex S106 Agreements. • Infrastructure costs and contributions agreed, with main landowners (including Shropshire Council) working collaboratively towards delivery. • Development to be brought forward in coordinated phases. <p>Residential Phase 1 of the Shrewsbury West SUE:</p> <ul style="list-style-type: none"> • Full Planning Permission (20/01957/FUL) granted for 340 dwellings on the first phase of residential development. Development has now commenced and is progressing at pace. <p>Residential Phase 2 of the Shrewsbury West SUE:</p> <ul style="list-style-type: none"> • Full Planning Application (22/03543/FUL) pending decision with a resolution to grant reached for 106 dwellings. It is anticipated that development will commence shortly after Planning Permission is granted. <p>Residential Phase 3 of the Shrewsbury West SUE:</p> <ul style="list-style-type: none"> • Land is in Shropshire Council ownership. There is a commitment to bring this phase forward for development. <p>Health/Care Campus Phase of the Shrewsbury West SUE:</p> <ul style="list-style-type: none"> • Development to be implemented in a series of sub-phases. <ul style="list-style-type: none"> -Sub-phase 1 was granted Full Planning Permission (14/05707/FUL) for 85 extra-care apartments, which have since been completed. -Sub-phase 2 was granted Full Planning Permission (20/04541/FUL) for 54 extra-care apartments/bungalows as an extension to the existing facility. Development is currently ongoing. -Sub-phase 3 was granted Outline Planning Permission (20/04544/OUT) for health/medical office accommodation. -The remaining sub-phases are in Shropshire Council ownership and there is a commitment to bringing these sub-phases forward for development. <p>General:</p> <ul style="list-style-type: none"> • Shortly multiple outlets will be operating across the Shrewsbury West SUE. • The remainder of the residential component of the allocation (and other elements of the site) are in Shropshire Council ownership. The Council is committed to securing development on these components of the site. • Forecasted completion rates for this site are very likely to be overly cautious.

Location	Name	Status
Oswestry	Eastern Gateway SUE	<p>Overview:</p> <ul style="list-style-type: none"> • Site to be the subject of a comprehensive development, to include approximately 900 dwellings and related infrastructure. • The site has been in part facilitated by HIF funded improvements (£9.3m granted to Shropshire Council by Homes England) to the nearby Mile End Roundabout, Oswestry, which are now completed. • Development to be brought forward in coordinated phases - with various phases implemented concurrently. • To the east of this site is the Oswestry Innovation Park employment allocation. This site will deliver high-quality employment for Oswestry and the surrounding area. <p>Residential Phases 1 and 2 of the Eastern Gateway SUE:</p> <ul style="list-style-type: none"> • Outline Planning Permission (16/02594/OUT) granted for up to 600 dwellings in April 2020. With development to occur over a series of sub-phases. -Reserved Matters Permission (21/04449/REM) granted for 284 dwellings post 31st March 2022 for the first of these phases. <p>Residential Phase 3 of the Eastern Gateway SUE:</p> <ul style="list-style-type: none"> • Outline Planning Permission (17/06025/OUT) granted for up to 150 dwellings in December 2020. -Reserved Matters Application (21/03584/REM) now pending consideration for 120 dwellings. <p>Residential Phase 4 of the Eastern Gateway SUE:</p> <ul style="list-style-type: none"> • Land is in Shropshire Council ownership. Shropshire Council is committed to bringing forward this phase of development. <p>General:</p> <ul style="list-style-type: none"> • Shortly multiple outlets will be operating across the Eastern Gateway SUE. • The remainder of this allocation is in Shropshire Council ownership. The Council is committed to securing development on this component of the site. • Forecasted completion rates for this site are very likely to be overly cautious.

5.68. The latest information available has been drawn upon to assess the deliverability (including lead-in times and delivery rates) of each of the SUE's as part of this assessment of the housing land supply in Shropshire.

Other 'Saved' Site Allocations

5.69. The adopted SAMDev Plan (2015) identifies further housing land allocations, which together with other sources of housing land supply are sufficient to ensure the delivery of the agreed Core Strategy (2011) vision and housing requirements. Many of these allocations are proposed to be 'saved' to support the achievement of the proposed housing requirement within the draft Shropshire Local Plan.

Deliverability of Proposed 'Saved' Allocations

5.70. The NPPF states that: *"To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”²⁹.

- 5.71. Consistent with this definition of deliverable, Shropshire Council has taken a cautious approach to the inclusion of proposed saved allocations within the first five years of the housing land supply, only including those which are considered to be available now, offer a suitable location for development now, and are achievable with a realistic prospect that housing will be delivered on the site within five years. The availability, suitability and achievability of allocations has been documented within Appendix E.
- 5.72. Furthermore, only the numbers of homes that are considered deliverable within five years are counted, which in many cases is considerably less than the sites’ full capacity. Deliverability has been informed by ‘standard’ lead in times and build rates identified for this assessment, refined through pro-active discussions with landowners, land promoters and developers to ensure that Shropshire Council can have significant confidence that assumptions for each site are realistic.
- 5.73. To ensure the robustness of this assessment, a very cautious assumption that 10% of deliverable dwellings on proposed ‘saved’ site allocations will not be delivered in the five year period is applied.
- 5.74. Please Note: It must be stressed, of course, that inclusion of proposed ‘saved’ site allocations is without prejudice to the Local Plan process or the determination of any planning application for the site.**
- 5.75. These sites are identified within Appendix E of this document.

Sites proposed for allocation within the draft Shropshire Local Plan (Appendix F)

- 5.76. The NPPF states that: *“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*
- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
- b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”³⁰.*
- 5.77. The purpose of this assessment is to consider whether there are sufficient deliverable sites within Shropshire to allow for the provision of five years’ worth of housing (plus an appropriate buffer, moved forward from later within the proposed

²⁹DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

³⁰DLUHC (was HCLG), (2021), NPPF – Annex 2: Glossary

plan period, to allow for choice and competition in the market), based on the proposed housing requirement within the draft Shropshire Local Plan.

- 5.78. In addition to the identification of a proposed housing requirement, the draft Shropshire Local Plan also proposes a series of allocations, to contribute towards achieving the proposed housing requirement. Given that the assessment of supply is based on the proposed housing requirement within the draft Shropshire Local Plan, it is also considered appropriate to consider the deliverability of these sites, which are proposed to achieve the proposed housing requirement, so as to ensure a consistent and appropriate assessment. Particularly as the only circumstance within which the proposed housing requirement within the draft Shropshire Local Plan represents the 'yardstick' for measuring housing land supply would be where the draft Shropshire Local Plan has been through a successful independent examination by a Government appointed Planning Inspector and subsequent adoption by Shropshire Council.
- 5.79. However, to ensure robustness, Shropshire Council has taken a very cautious approach to the inclusion of draft Shropshire Local Plan proposed allocations within the first five years of the housing land supply, only including those site which are considered to be available now, offer a suitable location for development now (assuming that the draft Shropshire Local Plan is subsequently adopted – as this is the circumstance within which the proposed housing requirement would become applicable), and are achievable with a realistic prospect that housing will be delivered on the site within five years. The availability, suitability (assuming that the draft Shropshire Local Plan is subsequently adopted – as this is the circumstance within which the proposed housing requirement would become applicable) and achievability of allocations has been documented within Appendix F.
- 5.80. Furthermore, only the numbers of homes that are considered deliverable within five years are counted, which in many cases is considerably less than the sites' full capacity. Deliverability has been informed by 'standard' lead in times and build rates identified for this assessment, refined through pro-active discussions with landowners, land promoters and developers to ensure that Shropshire Council can have significant confidence that assumptions for each site are realistic.
- 5.81. To ensure the robustness of this assessment, a very cautious assumption that 10% of deliverable dwellings on allocated sites will not be delivered in the five year period is applied.
- 5.82. **Please Note: It must be stressed, of course, that inclusion of proposed allocations identified within the draft Shropshire Local Plan in the housing land supply is without prejudice to the Local Plan process or the determination of any planning application for the site.**
- 5.83. These sites are identified within Appendix F of this document.

Sites from the Strategic Land Availability Assessment (SLAA) (Appendix G)

- 5.84. Within Shropshire, windfall development on unallocated sites forms a significant proportion of all residential development that takes place. Indeed, the adopted Core Strategy (2011) and SAMDev Plan (2015) and the draft Shropshire Local Plan all recognise the importance of windfall development in Shropshire and make allowances for and facilitate the delivery of appropriately located windfall sites (where they accord with the policies within the adopted or draft Local Plan). This supports the conclusion that windfall development does and will continue to represent an important part of the housing land supply.

- 5.85. Furthermore, best available data on past completions continues to support the importance of windfall sites as an important and appropriate source of supply for residential development. Specifically, over the last five years (2017/18-2021/22), some 5,158 dwellings have been completed on windfall sites in Shropshire (1,683 dwellings on small scale windfall sites of less than 5 dwellings and 3,475 dwellings on medium and large scale windfall sites of 5 or more dwellings).
- 5.86. Over the same five year period (2017/18-2021/22), the average number of dwellings completed on windfall sites equated to some 1,024 dwellings per annum (337 dwellings per annum on small scale windfall sites of less than 5 dwellings and 695 dwellings per annum on medium and large scale windfall sites of 5 or more dwellings).
- 5.87. The Strategic Land Availability Assessment (SLAA) is a technical assessment of the suitability; availability; and achievability (including viability) of land for housing and employment development. The SLAA considers sites and broad locations for residential development where they are **capable of delivering 5 or more dwellings**. Generally, sites of less than 0.2 hectares are unlikely to achieve these thresholds.
- 5.88. The SLAA was published in late 2018, following a call for sites in early 2017. In excess of 2,000 sites and broad locations were included within the assessment which has informed the draft Shropshire Local Plan.
- 5.89. As the SLAA assessment includes consideration of both sustainability (in accordance with the NPPF); and the suitability, availability and achievability (including viability) of sites, consistent within the definition of deliverability, it is considered reasonable to include the accepted sites which have an expected yield in the proposed plan period, within the housing land supply.
- 5.90. However, to ensure further robustness, a full site by site review has been undertaken of SLAA sites as part of this assessment of housing land supply and only those where the information available gives confidence that the sites are deliverable, have been included within the first five years of the housing land supply. Those sites considered to be developable within the proposed plan period have been included within the housing land supply for the remainder of the proposed plan period.
- 5.91. This review also included consideration of any updated information regarding site capacity and build rates - reflecting feedback from relevant site promoters, agents and/or developers.
- 5.92. Around 50 sites are included within the housing land supply, of which only around a very cautious 15 sites, are considered deliverable within the next five years.
- 5.93. To ensure the robustness of this assessment, a very cautious assumption that 10% of deliverable dwellings on SLAA sites will not be delivered in the five year period is applied.
- 5.94. Please Note: The SLAA database is continuously updated. Appendix G includes those SLAA sites from the current active SLAA database that are considered likely to be delivered within the next five years or developable within the proposed plan period. It should be noted that SLAA sites represent only those sites which the Council are aware of and are included within the SLAA database. In reality, there is likely to be a significant amount of additional site opportunities within the development boundaries of identified settlements.

- 5.95. **It should be stressed, of course, that inclusion of a SLAA site within this assessment of Housing Land Supply is without prejudice to the Local Plan process or the determination of any planning application for that site.**

Affordable Housing Sites Including Homes England (HE) Funded Sites (Appendix H)

- 5.96. Policies CS5 and CS11 of the Core Strategy (2011); Policy MD7a of the SAMDev Plan (2015); and the supplementary guidance within the accompanying Type and Affordability of Housing Supplementary Planning Document (SPD), support the provision of **affordable housing**, including on sites outside settlement development boundaries and in rural hamlets, as an exception to normal planning policies – subject to specific policy requirements.
- 5.97. Similarly, Policies DP3, DP4, DP5, DP6 and DP7 of the draft Shropshire Local Plan support the provision of **affordable housing**, including on sites outside settlement development boundaries and in rural hamlets, as an exception to normal planning policies – subject to specific policy requirements.
- 5.98. Furthermore, the Council has consistently enabled such exception sites to come forward over the years, with great success.
- 5.99. A detailed review of affordable housing sites has been undertaken for this statement, with many such sites being included within the list of sites with Planning Permission; a Planning Application with a ‘resolution to grant’ or a site submitted to the SLAA and considered deliverable or developable.
- 5.100. However, there are a limited number of sites that Shropshire Council is aware of, on which schemes are being progressed, including those on which applications for Homes England (HE) funding have/will be submitted which do not yet have a Planning Permission/Planning Application with a ‘resolution to grant’ or were not submitted for consideration within the SLAA.
- 5.101. Shropshire Council has therefore undertaken a separate appraisal of these sites. Those which are considered deliverable have been included within this assessment of housing land supply. These sites are identified within Appendix H of this document.
- 5.102. **Please Note:** Shropshire Council has a close working relationship with Affordable Housing providers. We understand that there is a long lead-in process to taking forward an Affordable Housing scheme, particularly where it is subject to HE funding – which often also requires specific delivery timescales. Sites that have progressed to the point of applying for funding have had significant pre-application and community consultation, consequently the Affordable Housing providers and Shropshire Council have confidence that the sites that are considered deliverable within this assessment will come forward within the 5 year period.
- 5.103. To ensure the robustness of this assessment, Shropshire Council has applied a very cautious assumption that 10% of deliverable dwellings on affordable housing sites including HE funded sites will not be delivered in the five year period.
- 5.104. **However, it should be stressed, of course, that the inclusion of affordable housing sites including HE funded sites within this assessment of Housing Land Supply is without prejudice to the Local Plan process or the determination of any planning application for that site.**

Windfall Sites (Appendix I)

- 5.105. In addition to the larger SLAA sites previously considered, there is a need to take into account individual and small housing schemes. Small scale windfall sites of **less than 5 dwellings** have always represented a significant component of the housing land supply in Shropshire, and it is anticipated that this will remain the case.
- 5.106. As already documented, the adopted Core Strategy (2011) and SAMDev Plan (2015) and the draft Shropshire Local Plan all recognise the importance of windfall development in Shropshire and make allowances for and facilitate the delivery of appropriately located windfall sites (where they accord with the policies within the adopted or draft Local Plan). This supports the conclusion that windfall development does and will continue to represent an important part of the housing land supply.
- 5.107. Furthermore, as also documented above, best available data on past completions continues to support the importance of windfall sites as an important and appropriate source of supply for residential development. Specifically, over the last five years (2017/18-2021/22), some 5,158 dwellings have been completed on windfall sites in Shropshire (1,683 dwellings on small scale windfall sites of less than 5 dwellings and 3,475 dwellings on medium and large scale windfall sites of 5 or more dwellings).
- 5.108. Over the same five year period (2017/18-2021/22), the average number of dwellings completed on windfall sites equated to some 1,024 dwellings per annum (336 dwellings per annum on small scale windfall sites of less than 5 dwellings and 695 dwellings per annum on medium and large scale windfall sites of 5 or more dwellings).
- 5.109. These trends support the conclusion that windfall development does and will continue to represent an important part of the housing land supply.
- 5.110. The importance of small scale windfall housing in Shropshire is not surprising given that Shropshire is a large rural County containing the Strategic Centre of Shrewsbury; 5 Principal Centres (Bridgnorth, Ludlow, Market Drayton, Oswestry and Whitchurch); 11 Key Centres (Albrighton, Bishop's Castle, Broseley, Church Stretton, Cleobury Mortimer, Craven Arms, Ellesmere, Highley, Much Wenlock, Shifnal and Wem); rural settlements identified as Community Hubs and Community Clusters; hundreds of other rural villages and hamlets; and a significant rural hinterland. Consequently there is a constant and significant recycling of previously developed land; significant numbers of infill developments; high numbers of conversions of barns and other rural buildings; and high uptake of affordable housing, including under the 'build your own' affordable housing scheme (supported by Shropshire Council within Policies CS5 and CS11 of the Core Strategy (2011); MD7a of the SAMDev Plan (2015); supplementary guidance within the Type and Affordability of Housing SPD; and Policy DP6 of the draft Shropshire Local Plan).
- 5.111. The above factors therefore endorse the inclusion of a very cautious 299 dwellings per year, for years 4 and 5 of the supply and each year beyond the first five years (years 6+ of the proposed plan period).

Lapsed Planning Permission (Appendix J)

- 5.112. Often sites that have previously secured Planning Permission where the permission is not subsequently implemented within permitted timescales remain developable. Specifically, in many circumstances the site remains suitable for development and

available for development and will be achievable later within the proposed plan period, particularly as market conditions continue to improve.

- 5.113. Consequently, Shropshire Council has undertaken an assessment of sites with capacity for more than five dwellings (as it is anticipated that sites of less than 5 dwellings would be included within the windfall allowance, as identified in Appendix I of this document) in order to determine whether they are suitable for inclusion within the housing land supply.
- 5.114. Whilst none of these sites have been included within the first five years of the housing land supply, many have been deemed suitable for inclusion within the latter part of the proposed plan period. These sites are identified within Appendix J of this document.
- 5.115. **However, it should be stressed, of course, that inclusion of a site with a lapsed Planning Permission within this assessment of Housing Land Supply is without prejudice to the Local Plan process or the determination of any future planning application for that site.**

6. Proposed Housing Land Supply – Calculation

Shropshire Proposed Five Year Housing Land Requirement

6.1. Using the methodological approach outlined in Chapters 3 and 4, the proposed housing requirement for the five year period starting on the 1st April 2022 has been calculated, based on the proposed housing requirement identified in the strategic policies within the draft Shropshire Local Plan.

6.2. Table 8 provides a summary of the calculation of the five year housing requirement:

Table 8: Summary of Proposed Five Year Housing Requirement

Category		Proposed Requirement – draft Shropshire Local Plan
(A) 5 Year Requirement:	2022/23	1,400
	2023/24	1,400
	2024/25	1,400
	2025/26	1,400
	2026/27	1,400
	Total	7,000
(B) Under-Delivery: (from earlier in the proposed plan period)		0
(C) Buffer: (10% buffer consisting of supply brought forward from later in the proposed plan period to ensure choice and competition. Applied to both the requirement and past under-delivery)		700
(D) Total Requirement (A) + (B) + (C):		7,700

Shropshire Five Year Housing Land Supply

6.3. Using the methodological approach outlined in Chapter 5, a comprehensive assessment of housing land in Shropshire has been undertaken.

6.4. Table 9 provides a summary of the housing land supply in Shropshire considered deliverable within the next five years, as at the 1st April 2022:

Table 9: Summary of deliverable housing land supply (as at 1st April 2022)

Category	Net Dwellings
(A) Dwellings on sites with Planning Permission*	6,134
(B) Dwellings on sites with Prior Approval*	103
(C) Selected sites with a 'resolution to grant'* Planning Permission	71
(D) Dwellings on 'saved' site allocations estimated to be completed within 5 years*	1,242
(E) Dwellings proposed for allocation within the Draft Shropshire Local Plan estimated to be completed within 5 years*	1,492
(F) SLAA Sites deliverable within 5 years*	100
(G) Emerging affordable housing sites*	304
(H) Windfall sites**	598
Total: (A) + (B) + (C) + (D) + (E) + (F) + (G) + (H)	10,044

*A very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; 'saved' site allocations within the adopted Local Plan; proposed allocation within the draft Local Plan; identified within the SLAA; and identified as an Emerging Affordable Housing Site will not be delivered in the five year period has been applied to figures in this table.

**Based on historic delivery rates and expected future trends.

- 6.5. Shropshire Council includes a very cautious assumption that 10% of deliverable dwellings on sites with Planning Permission; Prior Approval; 'resolution to grant' Planning Permission; 'saved' site allocations within the adopted Local Plan; proposed for allocation within the draft Shropshire Local Plan; identified within the SLAA Sites; and Emerging Affordable Housing Sites will not be delivered in the five year period. This assumption is reflected within the figures provided within Table 10 of this document.
- 6.6. The actual number of dwellings considered deliverable in the next 5 years in each of these categories before this deduction is applied are:
- Dwellings on sites with Planning Permission: 6,816 dwellings.
 - Dwellings on sites with Prior Approval: 114 dwellings.
 - Dwellings on selected sites with a 'resolution to grant' Planning Permission: 79 dwellings.
 - Dwellings on selected 'saved' site allocations for development: 1,380 dwellings.
 - Dwellings on selected sites proposed for allocation for development: 1,658 dwellings.
 - Dwellings on selected SLAA sites: 111 dwellings.
 - Dwellings on sites seeking Homes England (HE) funding: 338 dwellings.
- 6.7. The sites which make up the various components of the five year housing land supply as at the 1st April 2022 are included within Appendices A-J of this statement.

Comparison: Shropshire Proposed Five Year Housing Land Requirement & Supply

- 6.8. Table 10 brings together the proposed five year housing land requirement, based on the proposed housing requirement within strategic policies within the draft Shropshire Local Plan, and the results of the assessment of the five year housing land supply in Shropshire.
- 6.9. This table confirms that Shropshire Council is able to demonstrate a five year housing land supply, based on the proposed housing requirement within strategic policies within the draft Shropshire Local Plan, as at the 1st April 2022.

Table 10: Comparison: Five Year Housing Requirement and Supply

Category	Proposed Requirement – draft Shropshire Local Plan
Total Requirement:	7,700
Total Supply:	10,044
Over / Under Provision:	2,344
Number of Years Supply:	6.52

7. Housing Land Supply – Conclusion

Five Year Housing Land Supply

- 7.1. This comprehensive review of the housing land supply establishes that there are sufficient deliverable sites to allow for the provision of five years' worth of housing (plus an additional buffer moved forward from later within the proposed plan period, to allow for choice and competition in the market), based on the proposed housing requirement in the strategic policies of the draft Shropshire Local Plan. Indeed, there is currently **6.52 years supply of deliverable housing land against the proposed housing requirement within strategic policies within the draft Shropshire Local Plan.**
- 7.2. Please Note: A similar assessment based on the housing requirement set out in adopted strategic policies / local housing need has also been undertaken and is available on the Shropshire Council website.

Conclusion

- 7.3. Shropshire Council, through its draft Shropshire Local Plan is positively planning for an ambitious but deliverable level of housing development to 2038. This is consistent with the adopted Local Plan, which also includes an ambitious but deliverable housing requirement.
- 7.4. Furthermore, the Council was involved in the production of the Marches Local Enterprise Partnership's (LEP) High Level Planning and Housing Statement "Poised for Growth"³¹. As these documents make clear, Shropshire Council is committed to creating an environment for successful housing delivery, and is working with the development industry and local communities to ensure that sustainable development is brought forward.
- 7.5. The reality is there is a significant and growing supply of housing land in Shropshire, sufficient to demonstrate a housing land supply to meet the housing requirement within strategic policies within the draft Shropshire Local Plan.
- 7.6. However, whilst Shropshire Council is taking a positive approach to planning for housing and there is a significant amount of land available for housing development, ultimately it is the responsibility of the development industry to deliver sustainable development, consisting of the right types of housing, in the right locations and within the right timescales.

³¹www.shropshire.gov.uk/marcheslepplanninghousingstatement/index.html

Five Year Housing Land **Supply Statement** **Annexes**

Annex 1. Housing Land Supply across the Proposed Plan Period

- A1.1. In addition to the assessment of the housing land supply available over the next five years, Shropshire Council has also undertaken a wider assessment of deliverable and developable sites, in order to determine whether there is sufficient housing land supply available to deliver the proposed housing requirement within strategic policies within the draft Shropshire Local Plan (30,800 dwellings between 2016/17 and 2037/38).
- A1.2. In order to ensure a robust assessment, the methodology used for appraising housing land supply across the total proposed plan period is consistent with that used for the appraisal of sites within the first five years – specifically a very cautious assumption that 10% of deliverable/developable dwellings on sites with Planning Permission; Prior Approval; ‘resolution to grant’ Planning Permission; ‘saved’ site allocations within the adopted Local Plan; proposed for allocation within the draft Shropshire Local Plan; identified within the SLAA Sites; and Emerging Affordable Housing Sites will not be delivered in each five year period has been applied. However, as these dwellings continue to be considered deliverable/developable they are re-considered within the subsequent 5 year periods.
- A1.3. Table 11 provides a summary of the housing supply in Shropshire, up to the end of the proposed plan period (2038):

Table 11: Housing Land Supply across the Proposed Plan Period

Category	Net Dwellings
Completions 2016/17 – 2021/22:	10,254
Years 1 - 5 Supply:	10,044
Year 6 - 10 Supply:	8,591
Years 11 - 15 Supply:	4,782
Years 16+ Supply:	1,171
Total:	34,842

- A1.4. Table 11 illustrates that there is sufficient deliverable or developable housing land identified in Shropshire to meet the total proposed housing requirement within strategic policies within the draft Shropshire Local Plan (30,800 dwellings). This allows for around 10% flexibility in the overall supply.
- A1.5. The sites which make up the various components of the housing land supply over the proposed plan period at the 1st April 2022 are also included within Appendices A-J of this statement.

Annex 2. Settlement Residential Completions and Supply

Introduction

A2.1. The information resulting from the assessment of the housing land supply for Shropshire can also be utilised to determine the net number of dwellings completed and committed by settlement with a proposed residential guideline in the draft Shropshire Local Plan:

Table 12: Residential Completions and Supply within the Strategic, Principal and Key Centres

Settlement	Completions (2016/17 - 2021/22)	Commitments		
		Sites with Planning Permission or Prior Approval (as at the 31 st March 2022)	'Saved' Allocations without Planning Permission (as at 31st March 2022)	Proposed allocations without Planning Permission (as at 31st March 2022)
Albrighton	102	102	83	180
Bishops Castle	47	28	40	0
Bridgnorth	117	42	550	1,050
Broseley	146	92	20	0
Church Stretton	30	59	0	0
Cleobury Mortimer	54	30	0	0
Craven Arms	56	45	325	0
Ellesmere	152	154	250	120
Highley	128	10	0	100
Ludlow	213	697	0	10
Market Drayton	238	391	60	435
Much Wenlock	41	36	0	120
Oswestry	418	834	343	240
Shifnal	1,153	50	0	230
Shrewsbury	3,399	2,124	602	2,410
Wem	183	110	0	210
Whitchurch	325	251	560	450

Please Note:

- Completions and commitments in each of the Strategic, Principal and Key Centres include exception development which contributes to the housing guideline for the relevant Strategic, Principal or Key Centre.
- Figures provided are net.

Table 13: Residential Completions and Supply within Strategic Settlements

Settlement	Completions (2016/17 – 2021/22)	Commitments		
		Sites with Planning Permission or Prior Approval as at the 31 st March 2022	‘Saved’ Allocations without Planning Permission as at the 31 st March 2022	Proposed Allocations within the draft Shropshire Local Plan without Planning Permission as at the 31 st March 2022
Clive Barracks, Tern Hill	0	0	0	750*
Former Ironbridge Power Station	0	0	0	1,000

*Of which 350 are considered deliverable within the proposed plan period.

Please Note:

- Completions and commitments in each of the Strategic Settlements include exception development which contributes to the housing guideline for the relevant Strategic Settlement. Figures provided are net.

Table 14: Residential Completions and Supply within Proposed Community Hubs

Settlement	Place Plan	Completions (2016/17 - 2021/22)	Commitments		
			Sites with Planning Permission or Prior Approval (as at the 31 st March 2022)	‘Saved’ Allocations without Planning Permission (as at 31 st March 2022)	Proposed allocations without Planning Permission (as at 31 st March 2022)
Bucknell	Bishop’s Castle	6	7	70	20
Chirbury	Bishop’s Castle	-1	1	27	14
Clun	Bishop’s Castle	4	3	60	20

Please Note:

- Completions and commitments in each of the Community Hubs include exception development which contributes to the housing guideline for the relevant Community Hub.
- Figures provided are net.

A2.2. The following table provide a breakdown of net dwelling completions and commitments by proposed Community Clusters within the draft Shropshire Local Plan (these Community Clusters do not have proposed residential development guidelines, but draft policies require consideration of the cumulative impact of development that has/will occur within these settlements):

Table 15: Residential Completions and Supply within Proposed Community Clusters

Settlement	Place Plan	Total Completions (2016/17 - 2021/22)	Commitments	
			Sites with Planning Permission or Prior Approval (as at the 31 st March 2022)	'Saved' Allocations without Planning Permission (as at the 31st March 2022)
Abcot, Beckjay, Clungunford, Hopton Heath, Shelderton and Twitchen (Three Ashes)	Bishop's Castle	2	6	0
Brompton, Marton, Middleton, Pentreheyling, Priest Weston, Stockton and Rorrington	Bishop's Castle	2	4	0
Lydbury North	Bishop's Castle	1	0	20
Newcastle and Whitcott Keysett	Bishop's Castle	1	0	0

Grinshill	Wem	2	0	0
Harmer Hill	Wem	18	10	0
Tilstock, Ash Magna/Ash Parva, Prees Heath, Ightfield and Calverhall	Whitchurch	60	99	5

Please Note:

- Completions and commitments in each of the Community Clusters include exception development which contributes to the housing guideline for the relevant Community Cluster.
- No allocations are proposed within the Community Clusters within the draft Shropshire Local Plan, as such a column for proposed allocations is not included within this table.
- Figures provided are net.

A2.3. The following table summarises the (net) dwellings completed and committed within the rural area (excluding proposed Community Hubs which have proposed residential development guidelines, but including proposed Community Clusters which do not have proposed residential development guidelines):

Table 16: Residential Supply Within the Wider Rural Area

	Completions (2016/17 – 2021/22)	Commitments	
		Sites with Planning Permission or Prior Approval as at the 31st March 2022	'Saved' Allocations without Planning Permission as at the 31st March 2022
Wider Rural Area (including proposed Community Clusters)	1,726	1,823	48

Please Note:

- Completions and commitments in the wider rural area exclude exception development which contributes to the housing guidelines of Strategic, Principal and Key Centres and Community Hubs.
- No allocations are proposed within the Community Clusters or wider rural area within the draft Shropshire Local Plan, as such a column for proposed allocations is not included within this table.
- Figures provided are net.

Appendix B. Deliverability of Sites for Major Development with Outline Planning Permission as at 31st March 2022

Planning Application	Address	Date of Decision	Deliverability
14/04019/OUT	Proposed Development Land To The East Of Avenue Road, Broseley, Shropshire	31/08/2016	Reserved Matters Permission (19/03639/REM) was granted for 16 dwellings post 31st March 2022. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
19/05151/OUT	Proposed Residential Development South Of Little Stocks Close, Kinlet, Shropshire	15/05/2020	Site was allocated within the SAMDev Plan (KLT001). A Full Planning Permission (22/01585/FUL) has ben granted for the drainage works. We understand the landowner is proactively progressing this scheme with the intention of submitting a Reserved Matters Application imminently and then implementing the development. Given this and the scale of the site it is considered that the site will be built out in the next five years. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
18/01027/OUT	Old Station Yard, Brownlow Road, Ellesmere, Shropshire	28/09/2021	A Hybrid Planning Permission (18/01027/OUT) for up to 65 dwellings - outline for 58 dwellings on the wider site and full for conversion of the railway station building to 7 dwellings. Full Planning Application (18/01026/FUL) granted for clearance/demolition of parts of the site. Reserved Matters Application (22/02280/REM) for 58 dwellings now pending consideration. The applicant is an affordable housing provider/developer - Homes Plus Ltd. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
20/02270/OUT	Land Adjacent To Glen Havon, Dudleston Heath, Shropshire	22/03/2022	Recent consent for a SAMDev Plan Allocation DUDH006. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
13/03862/OUT	Proposed Residential Development South Of A49, Ludlow, Shropshire	30/11/2015	Reserved Matters Application (18/05461/REM) pending consideration for development of 213 dwellings on the site. Proactive discussions ongoing between the case officer and applicant particularly regarding pedestrian access to the site. A Full Planning Application (21/06007/FUL) is pending consideration for a new pedestrian link between the site and Bromfield Road. It is understood that the developer associated with the site (Tesni Homes) remains committed to the delivery of this site. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
14/00790/OUT	Land Off Bearstone Road, Norton In Hales, Market Drayton, Shropshire	05/06/2015	Outline application for the erection of fourteen dwellings incorporating two affordable units (to include formation of vehicular and pedestrian access). Full Planning Application (16/04166/FUL) granted for Plot 1. Reserved Matters Application (17/00767/REM) granted for Plot 2. Reserved Matters Application (17/03636/REM) granted at appeal for Plots 3 and 4. Reserved Matters Application (18/03832/REM) granted for Plots 5 and 6. Reserved Matters Application (16/05879/REM) granted for Plots 7 and 8. Reserved Matters Application (18/01469/REM) subsequently granted for Plot 8. Reserved Matters Application (15/05444/REM) granted for Plots 9, 10 and 11. Reserved Matters Application (18/01470/REM) subsequently granted for Plots 10 and 11. Reserved Matters Application (17/05872/REM) granted for Plot 12. Reserved Matters Application (17/03104/REM) granted for Plot 13. Reserved Matters Application (17/05995/REM) granted for Plot 14. A number of dwellings on this site have now been completed. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
20/02060/OUT	Land West London Road, Irelands Cross, Woore, Shropshire	30/09/2021	Recent consent for 10 dwellings. Subsequently, a Full Planning Application (22/03559/FUL) has been submitted for the development of the site and is pending consideration. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
16/02594/OUT	Proposed Development Land To The North Of Shrewsbury Road, Oswestry	22/04/2020	Site was allocated within the SAMDev Plan (OSW024). A Reserved Matters Permission (21/04449/REM) for the first phase under this Outline Planning Permission (284 dwellings) from a developer (Pickstock Homes) has been granted. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
17/06025/OUT	Proposed Residential Development Land To The South Of Middleton Road, Oswestry, Shropshire	16/12/2020	Site was allocated within the SAMDev Plan (OSW024). Reserved Matters Application (21/03584/REM) pending consideration for 120 dwellings. The applicant is a developer (Fletcher Homes). Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
17/01612/OUT	Land Between Preston Street & London Road, Shrewsbury, Shropshire	08/08/2018	This is a Hybrid Planning Application. Full consent is granted for 353 dwellings (Phase 1) and outline consent for up to 247 dwellings (Phase 2). A Reserved Matters Permission (19/05564/REM) has now been granted for phase 2 consisting of 257 dwellings. The site is being built out at pace by a number of outlets including Taylor Wimpey, Persimmon Homes and Charles Church. Assumptions made about build out rates were informed by proactive discussions with the developers and are very cautious. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.

Planning Application	Address	Date of Decision	Deliverability
17/02809/OUT	H M Prison, The Dana, Shrewsbury, Shropshire, SY1 2HR	14/09/2017	<p>A large site to be implemented in phases (five years for last Reserved Matters Application). Various conditions on the site have been discharged.</p> <p>A Reserved Matters Permission (18/03025/REM) was granted for formation of the access etc.</p> <p>A Reserved Matters Permission (18/03643/REM) was granted for phase 1 (conversion of school to 11 dwellings and demolition of school garage building to form 8 dwellings and parking) of residential development. This phase of development has been completed.</p> <p>Part of the site is now in a separate ownership and the new owners have secured a retrospective Planning Permission (22/05428/COU) for the change the use of the former Prison (Class C2A) to Sui Genesis, to allow the site to be used as a bespoke visitor and leisure attraction, including ancillary accommodation.</p> <p>It is understood that the remainder of the site remains in the same ownership and that the owner is intending to pursue development on this component of the site. This part of the site corresponds with the following components of the development approved within Planning Application 17/02809/OUT: New Build A (10 dwellings and office space), New Build C (30 dwellings and parking at ground level), an area of parking and the proposed Gymnasium. It is anticipated that a Planning Application will shortly be submitted for development of this component of the site.</p> <p>Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, that development is progressing and that development is achievable with a realistic prospect that housing will be delivered within five years.</p>
18/02392/OUT	Proposed Residential Development Land To The West Of Ellesmere Road, Shrewsbury, Shropshire	27/06/2019	<p>Reserved Matters Application (22/02949/REM) for 36 dwellings is pending consideration on the site.</p> <p>The applicant is a developer - Mara Homes (Shrewsbury) Limited.</p> <p>Shropshire Council considers that there is clear evidence that the site is available, offers a suitable location for development, and is achievable with a realistic prospect that housing will be delivered in the medium term.</p>
19/03905/OUT	Proposed Residential Development Land To The West Of Battlefield Road, Shrewsbury, Shropshire	07/07/2020	<p>Reserved Matters Application (22/00056/REM) granted post 31st March 2022 for development of 98 dwellings on the site.</p> <p>The applicant is a developer Jessup Brothers Ltd.</p> <p>The developers agent has advised that commencement of development will occur shortly after consent is granted and that the developer expects build-out by end of 2025.</p> <p>Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.</p>
19/04202/OUT	Lord Hill Hotel, Abbey Foregate, Shrewsbury, Shropshire, SY2 6AX	07/09/2021	<p>Hybrid Planning Permission (19/04202/OUT). Full Planning Permission is granted for the conversion of the listed hotel into 4 dwellings. Outline Planning Permission granted for residential development to the rear of the hotel following demolition of certain existing buildings.</p> <p>Full Planning Permission (22/01013/FUL) granted for demolition of certain existing buildings.</p> <p>The applicant is a developer - SY Homes and the element of the scheme subject to Full Planning Permission is progressing at pace. Known interest in progressing the element of the site subject to Outline Planning Permission.</p> <p>Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.</p>
19/04389/OUT	Proposed Development Land To The South Of Meole Brace Retail Park, Shrewsbury, Shropshire	02/12/2021	<p>Proposed allocation (SHR145) within the draft Shropshire Local Plan.</p> <p>Planning Permission granted at appeal. Within the Inspectors Report it was concluded that <i>"Although the Council has more than a 5-years supply of deliverable housing land, housing requirements are set as minima. Therefore, the delivery of up to 150 dwellings would positively support the Government's objective of significantly boosting the supply of homes. There would also be significant social benefits associated with this in terms of the greater availability and choice of new housing."</i> As such it is clear that the inspector felt that the site was deliverable.</p> <p>Furthermore, the site promoters Regulation 19 Representation on the draft Shropshire Local Plan (A0036) states <i>"Site represents a viable and deliverable option which can be brought forward within the short term (0-5) years."</i></p> <p>Subsequent Reserved Matters Application (22/04331/REM) now pending consideration for 150 dwellings. The applicant is a developer (Bellway Homes).</p> <p>Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.</p>
19/05426/OUT	Marches Care Limited, The Uplands, Clayton Way, Bicton Heath, Shrewsbury, Shropshire, SY3 8GA	12/02/2020	<p>The Planning Application is for an extra-care facility to complement the successful adjacent Uplands Care Home.</p> <p>Proposals are for 28 apartments across two buildings.</p> <p>We understand that submission of a Reserved Matters Application was delayed due to Covid 19 and associated considerations, however the applicant remains intent on bringing forward the development in the future. Due to the nature of the proposals, development works can progress rapidly and as such it is considered there is a reasonable prospect that housing will be delivered within five years.</p> <p>Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.</p>
20/05065/OUT	Flax Mill, Spring Gardens, Shrewsbury, Shropshire	10/05/2021	<p>Site allocated within the SAMDev Plan (SHREW198).</p> <p>Hybrid Planning Permission (20/05065/OUT) granted, which includes 120 dwellings.</p> <p>Extensive works have been undertaken on the site:</p> <p>Full Planning Permissions granted for works to the main mill, dye and stove houses and silos. Works on each of these buildings have either commenced or been completed.</p> <p>Another Full Planning Application granted for off-site works to the highway, these works are ongoing.</p> <p>On 8 June 2022, Shropshire Council made a Compulsory Purchase Order pursuant to section 226(1)(a) of the Town and Country Planning Act 1990 to assemble the land required to deliver a mixed-use development comprising residential accommodation, together with commercial, business and service uses being a key element of the wider regeneration of Shrewsbury Flaxmill Maltings.</p> <p>Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.</p>
21/02982/OUT	Development Land To The South Of Oteley Road, Shrewsbury, Shropshire	20/01/2022	<p>Reserved Matters Application (22/01867/REM) for 35 dwellings was granted post 31st March 2022.</p> <p>Site forms part of the wider Shrewsbury South SUE, development of the various residential parcels on this site are coming forwards at pace.</p> <p>The applicant is a developer - Lioncourt Homes.</p> <p>Shropshire Council considers that there is clear evidence that the site is available, offers a suitable location for development, and is achievable with a realistic prospect that housing will be delivered in the medium term.</p>

Planning Application	Address	Date of Decision	Deliverability
20/01054/OUT	Land West Of Lowe Hill Road, Wem, Shropshire	28/01/2022	Site allocated within the SAMDev Plan (WEM003). Outline Planning Permission granted at appeal. Known developer interest. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.
13/03481/OUT	Storage Land And Premises (former Dairy), Mile Bank Road, Whitchurch, Shropshire	17/09/2015	On-site demolition works have commenced under Full Planning Permission (18/01740/FUL). Reserved Matters Application (18/00552/REM) granted post 31st March 2022 for development of 70 dwellings. The applicant is Homes England. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.

Appendix E. ‘Saved’ site allocations within the adopted Local Plan

Allocation			Suitability, Availability, Achievability (including Viability) Assessment			
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability
ALB002	Land at White Acres, Albrighton	Erection of 180 dwellings	Allocated site.	Represented through the site allocation process. No known impediments to the availability of the site. Development company established for Phases 1 and 2 of the site, which now benefit from Planning Permission (BR/APP/OUT/08/0907 and 14/05456/REM for Phase 1 and 15/02448/FUL for Phase 2) and development has commenced. Phase 3 has a willing landowner and known developer interest.	Represented through the site allocation process. No known impediments to the availability of the site. Development company established for Phases 1 and 2 of the site, which now benefit from Planning Permission (BR/APP/OUT/08/0907 and 14/05456/REM for Phase 1 and 15/02448/FUL for Phase 2) and development has commenced. Phase 3 has a willing landowner and known developer interest.	No known viability concerns.
ALB003	Land East of Shaw Lane, Albrighton	Erection of 20 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. Site to be implemented in two phases. Phase 1: Outline and Reserved Matters Planning Permissions (14/03657/OUT and 19/02785/REM) granted for 3 dwellings. Phase 2: Full Planning Application (21/05665/FUL) is now pending decision with a resolution to grant reached for 24 dwellings.	Site promoted through the site allocation process. No known impediments to the availability of the site. Site to be implemented in two phases. Phase 1: Outline and Reserved Matters Planning Permissions (14/03657/OUT and 19/02785/REM) granted for 3 dwellings. Phase 2: Full Planning Application (21/05665/FUL) is now pending decision with a resolution to grant reached for 24 dwellings.	No known viability concerns.
BISH013	Schoolhouse Lane East, Bishop's Castle	Erection of 40 dwellings	Allocated site.	Site promoted through the site allocation process. Single landowner. No known impediments to the availability of the site.	Site promoted through the site allocation process. Bishop's Castle is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.	Bishop's Castle is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.
BUCK001	Timber/Station Yard, Bucknell	Erection of 70 dwellings	Allocated site.	Brownfield site within the settlement. Site promoted through the site allocation process. No known impediments to the availability of the site.	Brownfield site within settlement. Full Planning Application (13/03241/FUL) pending consideration for 50 dwellings on part of the site. The total site capacity is 70 dwellings. Bucknell is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.	Bucknell is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.
CHIR001	Land to the rear of Horseshoe Road, Chirbury	Erection of 30 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site. One landowner (Estate). Hybrid Planning Application (21/01136/FUL) pending decision with a resolution to grant for development of the site. The Hybrid Planning Application specifies that development will consist of two phases. Phase 1: Which is subject to the Full component of the Hybrid Planning Application is for 13 affordable dwellings, which would support the wider delivery of the allocation. Phase 2: Which is subject to the Outline component of the Hybrid Planning Application is for 27 dwellings.	Site promoted through the site allocation process. Hybrid Planning Application (21/01136/FUL) pending decision with a resolution to grant for development of the site. The Hybrid Planning Application specifies that development will consist of two phases. Phase 1: Which is subject to the Full component of the Hybrid Planning Application is for 13 affordable dwellings, which would support the wider delivery of the allocation. Phase 2: Which is subject to the Outline component of the Hybrid Planning Application is for 27 dwellings. No known impediments to the availability of the site. Outline and Reserved Matters Planning Permissions (14/01173/OUT and 16/02491/REM) granted on this site for 43 dwellings.	Site promoted through the site allocation process. Outline and Reserved Matters Planning Permissions (14/01173/OUT and 16/02491/REM) granted on this site for 43 dwellings.	Outline and Reserved Matters Planning Permissions (14/01173/OUT and 16/02491/REM) granted on this site for 43 dwellings.
CMO002	Land off Tenbury Road, Cleobury Mortimer	Erection of 12 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
CMO005	Land at New House Farm, Cleobury Mortimer	Erection of 7 dwellings	Allocated site.	Site promoted through the site allocation process. Development subject to access off Tenbury Road or via adjoining site off Tenbury Road (CMO002). Outline Planning Permission (19/05260/OUT) granted for 5 dwellings.	Site promoted through the site allocation process. Adjacent allocation has reserved matters approval. Outline Planning Permission (19/05260/OUT) granted for 5 dwellings.	No major viability issues raised to date.
KLT001	Land off Little Stocks Close, Kinlet	Erection of 20 dwellings	Allocated site.	Site promoted through the site allocation process. Part of site has been transferred to a Registered Social Landlord (RSL), the remainder is owned by the Estate. Planning Permissions granted on both aspects of the site and phase 1 has been built out. No known impediments to the availability of the site.	Site promoted through the site allocation process. Full Planning Permission (14/00897/FUL) granted for 8 dwellings, which has subsequently been completed. Outline Planning Application granted for a further 15 dwellings. Likely to be delivered. Total site capacity 23 dwellings.	No known viability concerns.
CRAV002	Land off Watling Street, Craven Arms	Erection of 25 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
CRAV003 & CRAV009	Land between Watling Street and Brook Road, Craven Arms	Erection of 235 dwellings	Allocated site.	Site promoted through the site allocation process. No developer involvement but willing landowner with track record of releasing land for development of the town.	Site promoted through the site allocation process. Indicative layout and other supporting information provided. Surface water flood risk affects part of combined site but can be accommodated through a SUDS scheme requiring all of CRAV009 for provision of swales and balancing ponds for flood storage capacity. Development linked to provision of northern highway access to town, and landowners to form part of delivery partnership.	Significant constraints but supporting information provided, therefore the site is still considered viable. Shropshire Council has submitted highway infrastructure associated with this and other sites for inclusion within National Highways ongoing Route Strategy update.
CRAV004 & CRAV010	Land off Watling Street East, Craven Arms	Erection of 60 dwellings	Allocated site.	Site promoted through the site allocation process. The site is now owned by a developer (Connexus) who are pursuing development of the site. Full Planning Permission (18/04931/FUL) for phase 1 granted and development now completed. Phase 2 expected to follow on.	Site promoted through the site allocation process. No highway access constraint at this point on Watling Street. No known impediments to the availability of the site. The site is now owned by a developer (Connexus) who are pursuing development of the site. Full Planning Permission (18/04931/FUL) for phase 1 granted and development now completed. Phase 2 expected to follow on.	Some viability risk resulting from archaeological interest, but earlier evaluation indicates no fundamental constraints - potential impact limited to reduction in site capacity.
CRAV024	Land adjoining Clun Road / Sycamore Close, Craven Arms	Erection of 25 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site.	Site promoted through the site allocation process. No highway access constraint at this point on Watling Street. No developer involvement but willing landowner with track record of releasing land for development of the town.	No significant viability constraints.

Allocation			Summary	Allocation			Years 1-5: Forecasting as at 31st March 2022					
Allocation Reference	Address	Proposal		Net Dwellings	Net Completions	Net Outstanding	2022/23	2023/24	2024/25	2025/26	2026/27	Total
NEE001	The Pheasant Inn, Neenton	Erection of 7 dwellings	Development completed.	0	0	0						0
HO2	Land off Avenue Road, Broseley	Erection of 20 dwellings	Site promoted through the Neighbourhood Plan process and subsequently allocated within the Broseley Neighbourhood Plan with an indicative capacity of around 20 dwellings. Adjoining site in same ownership has Outline and Reserved Matters Planning Permission for a mixed use development including 16 dwellings, it is expected that this site will follow on from development of this site.	20	0	20				20		20
CSTR018	School Playing Fields, Church Stretton	Erection of up to 50 dwellings	It is understood that this site is not available for development.	0	0	0						0
CSTR019	Battlefield to rear of Oaks Road/Alison Road, Church Stretton	Erection of 50 dwellings	Greenfield site on the edge of the settlement, within the settlement boundary. Outline and Reserved Matters Planning Permissions (14/01173/OUT and 16/02491/REM) granted on this site for 43 dwellings. Development has been implemented.	0	0	0						0
CMO002	Land off Tenbury Road, Cleobury Mortimer	Erection of 12 dwellings	Development completed.	0	0	0						0
CMO005	Land at New House Farm, Cleobury Mortimer	Erection of 7 dwellings	Straightforward small greenfield site on edge of settlement, within the settlement boundary. Single land ownership. No fundamental planning issues. Parish Council support. Likely to be delivered following completion of CMO002, which recently had Reserved Matters Approved. Outline Planning Permission (19/05260/OUT) granted for 5 dwellings. Shropshire Council understands that a Reserved Matters Planning Application will be submitted shortly and it is considered that this scheme is likely to be delivered.	0	0	0						0
KLT001	Land off Little Stocks Close, Kinlet	Erection of 20 dwellings	Straightforward greenfield site on edge of settlement. Phase 1: Full Planning Permission (14/00897/FUL) granted for 8 dwellings, which has subsequently been completed. Phase 2: Outline Planning Permission (19/05151/OUT) granted for 15 dwellings. Shropshire Council understands that a Reserved Matters Planning Application will be submitted shortly and it is considered that this scheme is likely to be delivered.	0	0	0						0
CRAV002	Land off Watling Street, Craven Arms	Erection of 25 dwellings	Development completed.	0	0	0						0
CRAV003 & CRAV009	Land between Watling Street and Brook Road, Craven Arms	Erection of 235 dwellings	Greenfield site within settlement - sustainable development subject to widening of Watling Street and provision of new junction (landowners to form part of delivery partnership), retention of veteran trees and flood storage capacity provision. Site promoted with indicative layout and other supporting information. No developer involvement but willing landowner with track record of releasing land for development of the town. Shropshire Council has submitted highway infrastructure associated with this and other sites for inclusion within National Highways ongoing Route Strategy update. Town Council support. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within the specified timescales.	235	0	235						0
CRAV004 & CRAV010	Land off Watling Street East, Craven Arms	Erection of 60 dwellings	Greenfield site on edge of settlement with Town Council support. Known archaeological interest not considered to raise fundamental concerns in view of earlier evaluation (1991). Full Planning Permission (18/04931/FUL) for phase 1 granted and development now completed. It is anticipated that phase 2 will shortly follow on from phase 1 of the development. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.	60	0	60			10	25	25	60
CRAV024	Land adjoining Clun Road / Sycamore Close, Craven Arms	Erection of 25 dwellings	Greenfield site within edge of settlement. Sustainable development. No fundamental planning issues. Town Council support. Likely to be delivered following other allocations in the town.	25	0	25						0

Allocation			Suitability, Availability, Achievability (including Viability) Assessment			
Allocation Reference	Address	Proposal	Suitability	Availability	Achievability	Viability
CRAV030	Land at Newington Farmstead, Craven Arms	Erection of 5 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site.	Site promoted through the site allocation process. Detailed submission including indicative layout provided. Owners in negotiation with Highways Agency regarding A49 junction to serve adjoining abattoir development, with scope to also serve this site (but site has separate access in any event). Development likely to follow first phase of adjoining abattoir development which provides replacement livestock storage and releases site for redevelopment.	No known viability constraints.
CO002a & CO002b	Land to the West of Cockshutt	Erection of 10 dwellings	Allocated site.	Site promoted through the site allocation process. Straightforward small greenfield site. Full Planning Permission (17/05018/FUL) granted for 4 dwellings on phase 1 CO002b and development now completed. Phase 2 CO002a expected to follow on. No known impediments to the availability of the site.	Site promoted through the site allocation process and likely to be delivered. Full Planning Permission (17/05018/FUL) granted for 4 dwellings on phase 1 CO002b and development now completed. Phase 2 CO002a expected to follow on. Total site capacity considered to be 10 dwellings.	No major viability issues noted to date. Updated Highway evidence assessed and found to demonstrate delivery.
CO005 & CO0023	Land at Cockshutt House Farm and Land South of Kenwick Road, Cockshutt	Erection of 5 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
CO018	Land South of Chapel House Farm, Cockshutt	Erection of 5 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
DUDH006	Ravenscroft Haulage Site, Dudleston Heath	Erection of 20 dwellings	Allocated site.	Site promoted through the site allocation process. Land in single ownership. Outline Planning Permission (20/02270/OUT) granted on the site for 20 dwellings. No known impediments to the availability of the site.	Site promoted through the site allocation process. Outline Planning Permission (20/02270/OUT) granted on the site for 20 dwellings. Full delivery expected in next 5 years.	No known viability concerns
ELL003a & ELL003b	Land South of Ellesmere	Erection of 268 dwellings	Allocated site.	Site promoted through the site allocation process. No known impediments to the availability of the site.	Site promoted through the site allocation process. Outline Planning Permission (14/04047/OUT) previously granted for up to 250 dwellings. It is understood that there remains an intention to bring forward this site for development.	Part of the site is subject to flood risk, which will require due consideration. However, there are no known viability concerns.
TET001	Land South of Cairndale, Tetchill	Erection of 10 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
WFTN002	Land adjacent to St Andrew's Church, Welsh Frankton	Erection of 15 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
HIGH003	Land off Rhea Hall/Coronation Street, Highley	Erection of 30 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
LUD017	Land south of Rocks Green, Ludlow	Erection of 200 dwellings	Allocated site.	Site promoted through the site allocation process. Development to be implemented in phases, with a Hybrid Planning Permission (17/05189/FUL) granted for up to 200 dwellings. The applicant is the developer Pickstock Homes. Phase 1 consists of 68 dwellings and benefits from Full Planning Permission on the above hybrid Planning Permission. Development has commenced. Phase 2 consists of 67 dwellings and benefits from Reserved Matters Planning Permission (22/01684/REM) granted post 31st March 2022. Phase 3 is to follow on from Phases 1 and 2.	Site promoted through the site allocation process. Development to be implemented in phases, with a Hybrid Planning Permission (17/05189/FUL) granted for up to 200 dwellings. The applicant is the developer Pickstock Homes. Phase 1 consists of 68 dwellings and benefits from Full Planning Permission on the above hybrid Planning Permission. Development has commenced. Phase 2 consists of 67 dwellings and benefits from Reserved Matters Planning Permission (22/01684/REM) granted post 31st March 2022. Phase 3 is to follow on from Phases 1 and 2.	Infrastructure requirements identified from outset linked to allocation, so no viability issues.

HOD009, HOD010 & HOD011	Land to rear of Shrewsbury Street; Land off Station Road; and Shrewsbury Street Farm, Hodnet	Erection of up to 50 dwellings	Greenfield site. No known impediments to the availability of the site. Full Planning Permission (22/00741/FUL) granted post 31st March 2022 for 51 dwellings. The applicant is a developer - Pickstock Homes.	51	0	51			25	25	1	51
MD030, MD010 & MD028	Land off Rush Lane; and Land between Croft Way and Greenfields Lane, Market Drayton	Erection of 400 dwellings	Greenfield site on edge of town within A53 Bypass - sustainable development. Single point of access off A53 required for all the allocations that form this wider site. Site reflects local ambitions for greenfield recreational facilities. No fundamental planning issues. Complex land ownerships and single access required - Development Company coordinating delivery. MD030 West: Phases 1a and 2a: Outline Planning Permissions (14/01982/OUT / 14/04701/OUT) and a Reserved Matters Planning Permission (16/03082/REM) granted for 162 dwellings. Development is ongoing and near completion. Phase 3a: Planning Application (22/05349/FUL) pending consideration for 64 dwellings. MD030 East, MD010 & MD028: Phase 1b: Outline Planning Permission (14/03782/OUT) and subsequent Reserved Matters Planning Permission (21/01142/REM) granted for 209 dwellings. In summary, phases without an extant Planning Permission are 3a (currently the subject of a Full Planning Application) and 2b (no current Planning Application).	60	0	60				60		60
STH002	Part of land off Dutton Close, Stoke Heath	Erection of up to 25 dwellings	Straightforward part brownfield site with no fundamental planning issues. Outline and Reserved Matters Planning Permissionss (15/00415/OUT / 19/00471/REM) granted for 25 dwellings. Development commenced.	0	0	0						0
MIN002 & MIN015	Hall Farm, Minsterley	Erection of 17 dwellings	Site promoted through the site allocation process and in a single ownership. The Council understands that the land has been proactively promoted the site for sale and that a sale is now agreed. The purchaser is a developer which intends to bring forward the allocation for development. Development is to be implemented in two phases. The southern element of the site is for new build development whilst the northern element of the site is for the conversion of existing farm buildings for residential and employment purposes. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.	17	0	17				17		17

Allocation			Summary	Allocation			Years 1-5: Forecasting as at 31st March 2022					
Allocation Reference	Address	Proposal		Net Dwellings	Net Completions	Net Outstanding	2022/23	2023/24	2024/25	2025/26	2026/27	Total
GOB008	Land at Southlands Avenue, Gobowen	Erection of 20 dwellings	Small greenfield site, re-allocated from Oswestry Local Plan. No fundamental planning issues or significant outstanding objections. Parish Council support. Planning Permission (22/00201/FUL) granted for 38 dwellings post 31st March 2022. The applicant is a developer - Wrekin Housing Group. Development has commenced.	38	0	38		13	25			38
GOB012	Land between A5 and Shrewsbury railway line, Gobowen	Erection of 90 dwellings	No fundamental planning issues or significant outstanding objections. Parish Council support. Large greenfield site extending existing Fletcher Homes Wat's Meadow site (recently built out). Within their recent representation (February 2021) on the draft Shropshire Local Plan, the landowner confirmed that development of the site had been delayed due to unforeseen non-planning issues, however these issues have now been resolved and the land can now be made available for development (Reference A0510). Further discussions have confirmed intention to market the site for development. Allowing for discussed lead-in times to this marketing, the marketing itself and the Planning Application process, delivery is allowed for in years 5 onwards. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.	90	0	90					25	25
KK001	Land north of Lower House, Knockin	Erection of 15 dwellings	Development completed.	0	0	0						0

SHREW001	Land north of London Road, Shrewsbury	Erection of 50 dwellings	Straightforward greenfield site owned by Shropshire Council. The site is intended to be brought forward as a part self/custom-build development and part general housing development. Full Planning Permission (16/02049/FUL) was granted for a single dwelling on the site, with development subsequently completed. Hybrid Planning Permission (21/05981/FUL) granted post 31st March 2022 for 135 dwellings (103 dwelling subject to Full Planning Permission and 32 self-build dwellings subject to Outline Planning Permission). The applicant is a developer - Shropshire Council owned housing company Cornovii developments. It is considered that this site is available for development, represents a suitable location for development now, that a suitable development can be achieved on the site and there is a realistic prospect that housing will be delivered within five years. As such the site is considered deliverable within the five year period.	135	0	135		36	36	36	27	135
SHREW002, SHREW035, SHREW083, SHREW128, ELR64, ELR67 & ELR68	Shrewsbury West Sustainable Urban Extension	Erection of 750 dwellings	Principle of development established in Core Strategy. Comprehensive development to occur in accordance with adopted masterplan to include 750 dwellings, employment, the provision of new Oxon Link Road, and other infrastructure. The site is a sustainable urban extension, as such it is very large, in multiple ownerships and requires complex S106 Agreements. Infrastructure costs and contributions agreed, with main landowners (including Shropshire Council) working collaboratively towards delivery. Development to be brought forward in coordinated phases. Full Planning Permission (20/01957/FUL) granted for 340 dwellings on the first phase of residential development. The developer is Barratt David Wilson Homes. Development has now commenced and is progressing at pace. Full Planning Permission (22/03543/FUL) is pending decision with a resolution to grant reached for 106 dwellings on the second phase of residential development. The applicant is the developer Anwyll Homes. It is anticipated that development will commence shortly after Planning Permission is granted. Residential phase 3 is in Shropshire Council ownership. There is a commitment to bring this phase forward for development. The health/care campus phase of the development is to be implemented in a series of sub-phases. Sub-phase 1 was granted Full Planning Permission (14/05707/FUL) for 85 extra-care apartments, which have since been completed. Sub-phase 2 was granted Full Planning Permission (20/04541/FUL) for 54 extra-care apartments/bungalows as an extension to the existing facility. Development is currently ongoing. Sub-phase 3 was granted Outline Planning Permission (20/04544/OUT) for health/medical office accommodation. The remaining sub-phases are in Shropshire Council ownership and there is a commitment to bringing these sub-phases forward for development.	410	0	410			38	38	30	106

Allocation Reference	Address	Proposal		Net Dwellings	Net Completions	Net Outstanding	2022/23	2023/24	2024/25	2025/26	2026/27	Total
SHREW027	Land at Weir Hill Farm/Robertsford House, Preston Street and adjoining Land off London Road, Shrewsbury	Erection of 550-600 dwellings	Major greenfield site for coordinated development in two linked parts. Land in ownership of two national house builders (Taylor Wimpey and Persimmon Homes). Multiple outlets on the site. Hybrid Planning Permission (17/01612/OUT) granted for 600 dwellings. 353 of these dwellings have Full Planning Permission and 247 of these dwellings have Outline Planning Permission. Reserved Matters Planning Permission (19/05564/REM) subsequently granted for the 247 dwellings. Development progressing at pace.	0	0	0						0
SHREW028, SHREW029, SHREW075, SHREW107, SHREW114, SHREW127, ELR02 & ELR66	Shrewsbury South Sustainable Urban Extension, Shrewsbury	Erection of 950 dwellings	Principle of development established in Core Strategy. Comprehensive development in accordance with adopted masterplan to include approximately 950 dwellings, employment land and related infrastructure. Full Planning Permission (13/00893/FUL) granted on residential phases 1a and 1b, including 291 dwellings, now near completion. Full Planning Permission (21/01748/FUL) granted on phase 1a for a 66 bedroom Care Home, with development completed post 31st March 2022. Hybrid Planning Permission (18/04194/FUL) granted on the local centre phase 1 for a food store and specialist housing for older people (Outline Planning Permission applies to the care home and extra-care apartments). A Reserved Matters Planning Permission (19/04101/REM) was subsequently granted for an 80 bed Care Home, development of which was completed post 31st March 2022. The 57 extra-care apartments have now lapsed, but Shropshire Council understands that there remains developer interest and an intention to bring forward this form of development on the site. Shropshire Council considers that there is clear evidence that this component of site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years. Outline Planning Permission (14/04428/OUT) granted for residential phases 2a, 2b and 2c, including 500 dwellings and a Care Home. Series of Reserved Matters Planning Permissions (17/06149/REM, 19/00048/REM, 19/04460/REM and 19/05470/REM) granted for sub-phases of housing and associated works, development of these various phases have commenced and progressing at pace or been completed. Alternative Outline Planning Permission (21/02982/OUT) subsequently granted replacing the Care Home with 35 houses. A Reserved Matters Planning Permission (22/01867/REM) subsequently granted for this development post 31st March 2022. Full Planning Permission (16/02618/FUL) granted for phase 3 for 159 dwellings and development commenced and progressing at pace.	57	0	57				57		57

Site promoted through the site allocation process. Outline Planning Application (20/01054/OUT) granted on the site at appeal for up to 100 dwellings.	No known viability concerns.
WEM012	Land off Roden Grove, Wem	Erection of 10 dwellings	Allocated site.	Development Completed.	Development Completed.	Development Completed.
ASHP002	Land West of Ash Parva	Erection of 8 dwellings	Allocated site.	Development completed.	Development completed.	Development completed.
PH004	Former Cherry Tree Hotel and adjoining land, Prees Heath	Erection of 5 dwellings	Allocated site.	Site promoted through the site allocation process. Site in single ownership. Willing landowner. No known impediments to the availability of the site.	Site promoted through the site allocation process. Planning Applications covering this site and a significant additional area were withdrawn and refused respectively. It is considered that a viable scheme remains possible on the allocated site.	Brownfield site but no significant viability issues known. Planning Applications covering this site and a significant additional area were withdrawn and refused respectively. It is considered that a viable scheme remains possible on the allocated site.

Allocation			Summary	Allocation			Years 1-5: Forecasting as at 31st March 2022					
Allocation Reference	Address	Proposal		Net Dwellings	Net Completions	Net Outstanding	2022/23	2023/24	2024/25	2025/26	2026/27	Total
SHREW198	Land at Ditherington Flaxmill, Shrewsbury	Erection of 120 dwellings	Historic England as the primary landowner is leading the project. A masterplan for the site has been agreed and the site will be delivered in phases. Phase 1 consists of the new build element. Phase 2 consists of the restoration of the Main Mill and seven other listed historic buildings on the site in order to provide them with appropriate uses and secure their long term future. Significant funding has been secured for this project (including Heritage Lottery Funding; Culture Recovery Funding; ERDF funding; and LEP funding). Hybrid Planning Permission (first in 2011 and then more recently in 2021) (20/05065/OUT) was granted for the overarching redevelopment of the site, which includes 120 dwellings. Further Full Planning Permissions have been granted for works to various listed buildings. Another Full Planning Permission was granted for off-site works to the highway, these works are ongoing. The restoration of the Smithy, Stables, Main Mill and Kiln is now completed. Restoration of the Apprentice House, Cross Mill, Dye House and Warehouse and wider development of the site (including the 120 dwellings) are the next areas of focus. On 8 June 2022, Shropshire Council made a Compulsory Purchase Order pursuant to section 226(1)(a) of the Town and Country Planning Act 1990 to assemble the land required to deliver the mixed-use development comprising residential accommodation, together with commercial, business and service uses being a key element of the wider regeneration of Shrewsbury Flaxmill Maltings.	0	0	0						0
SHREW210/09, SHREW030/R, SHREW094 & SHREW019	Bowbrook/Radbrook, land between Mytton Oak Road and Hanwood Road, Shrewsbury	Erection of 550 dwellings	Development completed.	0	0	0						0
SHREW212/09	Land west of Longden Road, Shrewsbury	Erection of 175 dwellings	Development completed.	0	0	0						0
UFF006/10	Land between Manor Farm and Top Cottages, Uffington	Erection of up to 5 dwellings	Development completed.	0	0	0						0
SHAW004	Land to the rear of Brickyard Farm, Poynton Road, Shawbury	Erection of 50 dwellings	Development completed.	0	0	0						0
WEM003	Land off Pyms Road, Wem	Erection of 100 dwellings	Greenfield site with no fundamental planning issues. Likely to be delivered. Outline Planning Application (20/01054/OUT) recently granted on the site at appeal for up to 100 dwellings. Known developer interest in bringing forward the site for development. Shropshire Council considers that there is clear evidence that the site is available now, offers a suitable location for development now, and is achievable with a realistic prospect that housing will be delivered within five years.	0	0	0						0
WEM012	Land off Roden Grove, Wem	Erection of 10 dwellings	Development Completed.	0	0	0						0
ASHP002	Land West of Ash Parva	Erection of 8 dwellings	Development completed.	0	0	0						0
PH004	Former Cherry Tree Hotel and adjoining land, Prees Heath	Erection of 5 dwellings	Primarily brownfield site in Community Cluster located on A41/A49. Development subject to use of existing vehicular access off A41/A49. Parish Council support. Planning Applications covering this site and a significant additional area were withdrawn and refused respectively. It is considered that a viable scheme remains possible on the allocated site. Likely to be delivered in accordance with specified timescales.	5	0	5						0

The site is located within the Clun Catchment, as such its delivery is linked to compliance with draft Policy DP13 of the draft Shropshire Local Plan regarding achieving nutrient neutrality for the lifetime of the development and ensuring measures of achieving nutrient neutrality do not compromise the ability of the River Clun SAC to reach favourable conservation status. Such measures will be identified through a SPD, informed by a SAC Restoration Plan. The site is therefore considered developable within the Plan period.
WBR007 & WBR008	Land at Bank Farm, Worthen	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Predominantly greenfield site. The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site.
WBR010	Land South of the B4386, Worthen	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site.
ALV006 & ALV007	Land north of Daddlebrook Road and west of A442, Alveley	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site.
ALV009	Land Adjacent to The Cleckars, Alveley	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site.

Proposed Site Allocation		Summary	Proposed Site Allocation			Years 1-5: Forecasting as at 31st March 2022					
Proposed Site Allocation Reference	Address		Net Dwellings	Net Completions	Net Outstanding	2022/23	2023/24	2024/25	2025/26	2026/27	Total
CLU005	Land at Turnpike Meadow on B4368, Clun	<p>Greenfield site.</p> <p>The site is located within the Clun Catchment, as such its delivery is linked to compliance with draft Policy DP13 of the draft Shropshire Local Plan regarding achieving nutrient neutrality for the lifetime of the development and ensuring measures of achieving nutrient neutrality do not compromise the ability of the River Clun SAC to reach favourable conservation status. Such measures will be identified through a SPD, informed by a SAC Restoration Plan. The site is therefore considered developable within the Plan period.</p>	20	0	20	0	0	0	0	0	0
WBR007 & WBR008	Land at Bank Farm, Worthen	Predominantly greenfield site with no known fundamental planning issues. The site is considered suitable, available, achievable and viable. Considered likely to be delivered within the timescales identified.	25	0	25	0	0	0	0	0	0

Proposed Site Allocation		Suitability, Availability, Achievability (including Viability) Assessment			
<i>Proposed Site Allocation Reference</i>	<i>Address</i>	<i>Suitability</i>	<i>Availability</i>	<i>Achievability</i>	<i>Viability</i>
HNN016	Land South of Oak Street, Highley	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Large greenfield site. Site promoters Regulation 19 Representation (A0042) states "We can confirm that the site will be able to meet the Plan's development guidelines..." It also states "Allocation HNN016 is deliverable and viable." No known impediments to the achievability or viability of the site.
BUR002	Land adjoining Lineage Farm on A456, Burford	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site.
BUR004	Land adjoining Boraston Drive on A456, Burford	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Large greenfield site. Site promoters Regulation 19 Representation (A0118) indicates intention to comply with policy requirements and deliver the site. Site promoters Regulation 18 Response (extract provided as Appendix 3 of the Viability Topic Paper) states "Having regard to the proposed policy requirements for BUR004, including the mix of dwellings, the requirement to provide affordable housing and self-build homes, and the site specific factors (such as de-culverting the watercourse and addressing potential site contamination), we can confirm that the site is viable and deliverable. There is known market interest in the site due to Burford and Tenbury Wells being attractive and popular locations for home buyers. Finally, we also confirm that there are no known significant abnormal costs associated with developing the site." No known impediments to the achievability or viability of the site.
CHK002	Land north of The Crescent, Clee Hill	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site.
LUD056	Former Coach Depot & Land at Fishmore Road, Ludlow	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site has Planning Permission.	Site has Planning Permission.
LUD057	Former Depot, Riddings Road, Ludlow	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Small brownfield site. Existing buildings are potentially suitable for conversion. Site promoter has confirmed its viability and deliverability (Appendix 29 of the Viability Topic Paper). No known impediments to the achievability or viability of the site.

Proposed Site Allocation		Suitability, Availability, Achievability (including Viability) Assessment			
<i>Proposed Site Allocation Reference</i>	<i>Address</i>	<i>Suitability</i>	<i>Availability</i>	<i>Achievability</i>	<i>Viability</i>
HHH001 & HHH014	Land adjacent to the Primary School and The Grove, Hodnet	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoter correspondence (Appendix 20 of the Viability Topic Paper) states "We also confirm that in terms of viability then there are no current concerns or anticipated challenges taking into account all aspects of the sites and also relying on current market evidence." No known impediments to the achievability or viability of the site.
HKW009	Land at School Bank Road, Hinstock	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters correspondence (Appendix 24 of the Viability Topic Paper) states "Yes the site is viable, against the requirements in the Reg. 19 draft local plan. The owners are in discussion with the Tenant farmer, and there is no reason to suggest the site is not deliverable."
MDR006	Land adjoining Adderley Road, Market Drayton	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review. Site promoters Regulation 19 Representation (A0073) states "The site is controlled by SLG, and is considered to be deliverable in the first 5 years of the plan period."	Site promoters Regulation 19 Representation (A0073) states "SLG has undertaken an internal development appraisal of the site allowing for a policy compliant level of affordable housing, and it is considered to be viable. The site is greenfield and there are no known constraints on the land that would affect delivery. Relevant technical matters have been considered and are addressed within the technical reports as described above. The site is considered to be available and suitable for development in the short term, subject to achieving planning permission." It also states "Therefore, to conclude, these representations demonstrate that the allocation of the site is justified, and the site is deliverable in the next 5 years with no technical constraints." No known impediments to the achievability or viability of the site.
MDR012	Land to the east of Maer Lane and north of the A53, Market Drayton	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Site promoters Regulation 19 Representation (A0378) states "Our client offers full support for the proposed housing allocations off Maer Lane (MDR012 and MDR034), which we consider to be suitable, available and deliverable, early in the Plan period." The site will contribute towards aspirations for a new marina at Market Drayton through provision of improved pedestrian and cycle access to the existing canal towpath and any potential future marina.

Proposed Site Allocation		Suitability, Availability, Achievability (including Viability) Assessment			
<i>Proposed Site Allocation Reference</i>	<i>Address</i>	<i>Suitability</i>	<i>Availability</i>	<i>Achievability</i>	<i>Viability</i>
CES005	Land adjoining The Vicarage on A458, Cressage	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Site promoters Regulation 19 Representation (A0041) states "Proposed allocation CES005 is highly deliverable and viable." No known impediments to the achievability or viability of the site.
CES006	The Eagles public house on A458, Cressage	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review. Planning Application (21/02078/FUL) granted for the conversion of the former Public House to 2 dwellings. Construction of dwellings on the wider site is expected to follow on as phase 2 of this development.	Small brownfield site. Site promoter correspondence (Appendix 5 of the Viability Topic Paper) states "The site as a whole is viable as it is developable and deliverable. The phasing of the development is currently focused on the conversion of the former public house, which already has extant permission for the conversion to one dwelling. Research suggests it may be necessary to deliver two dwellings from the conversion. This is because the building has been listed and to achieve a high quality and economically viable conversion may require the development of an additional dwelling. The car park to the former public house is developable and deliverable in accordance with the proposed site guidelines and policies of the emerging Development Plan, the phasing of this part of the site will be determined against the emerging policies of the Development Plan which support the redevelopment of the site."

Proposed Site Allocation		Suitability, Availability, Achievability (including Viability) Assessment			
Proposed Site Allocation Reference	Address	Suitability	Availability	Achievability	Viability
MUW012VAR	Land adjoining the Primary School and Hunters Gate, Much Wenlock	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Site promoters Regulation 19 Representation (A0370) states "At this stage we have carried out a massing exercise and can confirm that the site can accommodate a maximum of 120 dwellings together with the required roundabout and drainage infrastructure. We have also commissioned all of the various reports necessary to support a planning application and will be bringing forward the application in 2021 to demonstrate commitment to delivery of the site. The Estate are committed to delivering a high quality, beautiful development which will be in keeping with the surrounding landscape and local vernacular. There will be a requirement for natural open space within the development and it is envisaged that the current planted boundary to the site will need to be displaced and replaced with compensatory planting on the new site boundary. It is proposed that the development will deliver a good mix of housing including fulfilling the policy requirement to build 20% of the overall housing numbers as affordable dwelling. The development will deliver a Community Infrastructure Levy (CIL) contribution of £59.64 per square metre of build and the development overall could generate an overall CIL receipt somewhere in the region of £900,000 to spend on local projects. The Estate are not seeking to reduce either of these contributions on viability grounds." The representation also states "We note and accept the development guidelines set by the Council."
GWR009	Land west of Agnes Hunt Memorial Bungalows, Gobowen	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Correspondence from site promoter (Appendix 9 of the Viability Topic Paper) states "I confirm that the site, reference GWR009 would be available and deliverable for future development in line with our earlier submission". No known impediments to the achievability or viability of the site.
KCK009	Land north of Church Lane, Knockin	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters Regulation 19 Representation (A0394) states: "KCK009 is deliverable" it also states "Bidwells on behalf of Bradford Estates has held pre-application discussions with Shropshire Council under reference PREAPP/19/00137 and we are keen to facilitate delivery as soon as the planning process allows it." No known impediments to the achievability or viability of the site.

Proposed Site Allocation Reference	Address	Suitability	Availability	Achievability	Viability
SMH031	Land east of Moors Bank, St Martins	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Site promoters Regulation 18 Response (extract provided as Appendix 11 of the Viability Topic Paper) states: "The Estate considers a residential scheme, on the basis of the Reg18 SPD policy requirements, to be viable and deliverable. The Estate has experience of joint venture delivery in conjunction with a development partner and it is envisaged that a similar approach will be utilised in respect of SMH031. This provides a model which removes initial land cost and provides for greater flexibility in project delivery. The Estate is therefore confident that a delivery model tested in respect of SAMDev allocation SMH031 can be replicated." No known impediments to the achievability or viability of the site.
SMH038	Former Ifton Heath Primary School, St Martins	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan. Planning Permission (20/02248/FUL) granted on the site for 35 dwellings.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan. Planning Permission (20/02248/FUL) granted on the site for 35 dwellings.	Site proactively promoted through the Local Plan Review. Planning Permission (20/02248/FUL) granted on the site for 35 dwellings.	Part greenfield and part brownfield site. The site is comparable to a development typology considered viable within the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan. No known impediments to the achievability or viability of the site. Planning Permission (20/02248/FUL) granted on the site for 35 dwellings.
WEF025	Land at West Felton	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Site promoter correspondence (Appendix 12 of the Viability Topic Paper) states "I can confirm the site is viable and deliverable." No known impediments to the achievability or viability of the site.
WHN024	Land off Donnett Close, Whittington	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters Regulation 19 Representation (A0403) states: "We support the allocation of Site WHN024 (Land off Donnett Close, Whittington) in Place Plan S14 for the development of 70 dwellings. The site is deliverable and achievable within the first five years of the Local Plan Review period." It also states "Site WHN024 is viable and deliverable having regard to the policy requirements identified within the 'Regulation 18': Pre-Submission Draft Shropshire Local Plan." No known impediments to the achievability or viability of the site.

SHR057 & SHR177	Land North of Mytton Oak Road, Shrewsbury	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Large greenfield site. Site promoter correspondence (Appendix 2 of the Viability Topic Paper) states "SHR057 and SHR177. These sites are viable and deliverable and the timescale is correct". No known impediments to the achievability or viability of the site.
SHR060, SHR158 & SHR161	Land between Mytton Oak Road and Hanwood Road, Shrewsbury	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Large greenfield site. Site promoters Regulation 19 Representation (A0356) states: "CEG is an experienced national strategic land promoter with a proven track record of delivering major sustainable urban extensions. There are no abnormal costs or technical constraints that would render the development of the site unviable or undeliverable. If necessary, CEG will submit its own detailed site-specific viability assessment in support of the draft allocation at the appropriate time, however we continue to question some of the broadbrush assumptions and conclusions reached in the Council's current evidence base on viability. CEG would once again welcome further engagement with the Council on this. In respect of deliverability, CEG is fully committed to preparing a masterplan, submitting a planning application and bringing forward the site for development as soon as possible. Some early discussions with housebuilders have taken place to date, and it is expected that a significant proportion of the site will be brought forward early in the plan period." No known impediments to the achievability or viability of the site.

Proposed Site Allocation		Suitability, Availability, Achievability (including Viability) Assessment			
<i>Proposed Site Allocation Reference</i>	<i>Address</i>	<i>Suitability</i>	<i>Availability</i>	<i>Achievability</i>	<i>Viability</i>
HDL006	Land south of Wedgefields Close, Hadnall	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters Regulation 19 Representation (A0454) states: "We represent a proposed allocated site and therefore we would be pleased to have the opportunity to answer any questions the Inspector may have and to demonstrate that the site is available and deliverable." No known impediments to the achievability or viability of the site.
SHA019	Land between the A53 and Poynton Road, Shawbury	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters Regulation 18 Response (extract provided as Appendix 18 of the Viability Topic Paper) states: "The site is viable and capable of coming forward as part of the Local Plan Review process." No known impediments to the achievability or viability of the site.
WEM010	Land off Pyms Road, Wem	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site adjoining existing allocation in same ownership (subject to a Planning Application - 21/02768/OUT). Site promoter correspondence (Appendix 25 of this document) states "On behalf of the landowner, I can confirm that proposed allocation WEM010 is a viable and deliverable site."
WEM025	Land off Trentham Road, Wem	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters correspondence (Appendix 26 of the Viability Topic Paper) states "With regard to the sites listed below I can confirm that further to the work undertaken to date that they remain very much viable and deliverable with regard to the policy requirements identified within the 'Regulation 19': Pre-Submission Draft Shropshire Local Plan. We will continue to undertake further diligence work in this respect." No known impediments to the achievability or viability of the site.
WEM033	Land off Whitchurch Road, Wem	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters Regulation 19 Representation (A0009) states: "JR Planning & Development supports the allocation of site WEM033 and confirms that it is available, deliverable and achievable." No known impediments to the achievability or viability of the site.
PPW025	Land North of Tudor House, Prees	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters Regulation 19 Representation (A0591) states "The land is available, viable and deliverable and will be brought forward at the earliest opportunity." No known impediments to the achievability or viability of the site.

Proposed Site Allocation		Summary	Proposed Site Allocation			Years 1-5: Forecasting as at 31st March 2022					
Proposed Site Allocation Reference	Address		Net Dwellings	Net Completions	Net Outstanding	2022/23	2023/24	2024/25	2025/26	2026/27	Total
HDL006	Land south of Wedgefields Close, Hadnall	Greenfield site. The site is considered suitable, available, achievable and viable. Considered likely to be delivered.	40	0	40	0	0	0	0	15	15
SHA019	Land between the A53 and Poynton Road, Shawbury	Greenfield site. The site is considered suitable, available, achievable and viable. Considered likely to be delivered. The Regulation 18 Response (extract provided as Appendix 18 of the Viability Topic Paper) states "It is anticipated that the Phase 1 site will come forward in the 'Short Term' (2020 to 2025)..." and "It is anticipated that the Phase 2 site will come forward in the 'Medium Term' (2025 to 2030)". It also states "realistic prospect that housing will be delivered on the site within five years."	80	0	80	0	0	0	25	25	50
WEM010	Land off Pyms Road, Wem	Large greenfield site. The site is considered suitable, available, achievable and viable. Considered likely to be delivered. Planning Application (20/01054/OUT) granted at appeal on the adjoining existing allocation in the same ownership.	120	0	120	0	0	0	0	0	0
WEM025	Land off Trentham Road, Wem	Greenfield site with no known fundamental planning issues. The site is considered suitable, available, achievable and viable. Considered likely to be delivered within the timescales identified. Site promoters correspondence (Appendix 26 of the Viability Topic Paper) states "With regard to the sites listed below [which included this site] I can confirm that further to the work undertaken to date that they remain very much viable and deliverable with regard to the policy requirements identified within the 'Regulation 19': Pre-Submission Draft Shropshire Local Plan. We will continue to undertake further diligence work in this respect."	30	0	30	0	0	0	15	15	30
WEM033	Land off Whitchurch Road, Wem	Greenfield site. The site is considered suitable, available, achievable and viable. Considered likely to be delivered. Site promoters Regulation 19 Representation (A0009) states: the site is deliverable early within the proposed Plan period.	60	0	60	0	0	0	0	0	0
PPW025	Land North of Tudor House, Prees	Greenfield site. The site is considered suitable, available, achievable and viable. Considered likely to be delivered. Site promoters Regulation 19 Representation (A0591) indicates that the site is deliverable early within the proposed Plan period.	35	0	35	0	0	0	0	0	0

Proposed Site Allocation		Suitability, Availability, Achievability (including Viability) Assessment			
<i>Proposed Site Allocation Reference</i>	<i>Address</i>	<i>Suitability</i>	<i>Availability</i>	<i>Achievability</i>	<i>Viability</i>
WHT014	Land at Liverpool Road, Whitchurch	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Greenfield site. Site promoters Regulation 19 Representation (A0201) states: "In light of PH's land interests we support the allocation of Land at Liverpool Road, Whitchurch (WHT014) for 70 new homes. The site is deliverable, sustainable and would complement the draft Plan's spatial strategy and can be brought forward in a manner that delivers the aspirations contained in the draft policy." It also states "In terms of deliverability, the site is in the sole control of PH who are committed to bringing it forward for development and intend to submit a planning application upon adoption of the Local Plan. Following approval of the planning application, we expect the site to yield approximately 50 dwellings per annum within the early part of the Plan Period. The site is suitable, available and achievable and, therefore, deliverable." No known impediments to the achievability or viability of the site.
WHT037 & WHT044	Land North of Chester Road, Whitchurch	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Large greenfield site. Site promoters Regulation 19 Representation (A0515) states "All three owners are working in collaboration and partnership with David Wilson Homes (DWH) to ensure the site is available, deliverable and comes forward for development, at the first opportunity." No known impediments to the achievability or viability of the site.
WHT042	Land North of Waymills, Whitchurch	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site identified through proportionate and robust site assessment process undertaken to inform the draft Shropshire Local Plan.	Site proactively promoted through the Local Plan Review.	Large greenfield site. Site promoters Regulation 18 Response (extract provided as Appendix 19 of the Viability Topic Paper) states "We can confirm that development of WHT042 is viable and deliverable, having regard to the policy requirements identified within the Pre-Submission Draft of the Shropshire Local Plan." No known impediments to the achievability or viability of the site.

Approved Application on at least part of the site.

Appendix G. Sites from the Strategic Land Availability Assessment (SLAA)

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
ALB003	Caravan storage, Station Road, Albrighton	The site is suitable for residential development, subject to appropriate management of any physical, heritage and environmental constraints present. For instance provision of an appropriate access to the site and management of the sites relationship with the railway line (e.g. noise). Furthermore the site is located within proximity of several TPO's therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also in proximity of one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
BIS016	Field adj. Blunden Hall, Brampton Road, Bishop's Castle	The site is within a settlement boundary and so suitable for development in principle. Any proposed development design and layout should complement the adjacent employment allocation. The site lies within 300m of a Conservation Area and several Listed Buildings. Development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Effort should be made to retain mature trees and hedgerows on the site.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
BIS020	Rear of surgery, Schoolhouse Lane, Bishop's Castle	Site is suitable for residential development subject to satisfactory access. The site is within 300m of a Scheduled Monument, a Conservation Area and several Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
BKL001	Field opposite the Junior School, Bucknell	The site is within the development boundary so development is acceptable in policy terms. Suitability is subject to appropriate management of any physical, heritage or environmental constraints present. For instance the site is in proximity to the River Redlake Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also within 300m of a Scheduled Monument, a Conservation Area and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	Shropshire Council Officers have investigated the availability of this site, but it remains unclear as to whether the site is available for this form of development. Therefore information gathered for the purpose of this study is unable to confirm that the site is available for this form of development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
BKL002	The Old Farm, Bucknell	The site is within the development boundary so development is acceptable in principle subject to material considerations. However, part of the site is within the River Redlake Wildlife Site, consequently development of this element of the site and an appropriate buffer is likely to lead to a significant adverse effect on one or more locally designated site(s) and as such is contrary to policy, therefore this part of the site is unsuitable for development. Additionally, part of the site is also within Flood Zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The suitability of the remainder of the site is subject to appropriate management of any physical, heritage and environmental constraints present. For instance part of the site is within and the remainder is in proximity of a Conservation Area. The site is also within proximity of a Scheduled Monument and one or more listed buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The element of the site that is not within a Local Wildlife Site is in proximity of this site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.

Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
ALB003	Caravan storage, Station Road, Albrighton	<p>The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p>						0						6
BIS016	Field adj. Blunden Hall, Brampton Road, Bishop's Castle	<p>The site is considered suitable; available; viable and achievable. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p> <p>Bishop's Castle is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.</p>						0						0
BIS020	Rear of surgery, Schoolhouse Lane, Bishop's Castle	<p>The site is considered likely to become available in the future; viable; and achievable. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. The site is also considered suitable for residential development subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p> <p>Bishop's Castle is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.</p>						0						0
BKL001	Field opposite the Junior School, Bucknell	<p>The site is considered suitable, available, viable and achievable (subject to any further necessary viability assessment). Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p> <p>Bucknell is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.</p>						0						0
BKL002	The Old Farm, Bucknell	<p>The site is available, achievable and viable. Whilst the site is located within the development boundary, there are a number of constraints that apply. This includes the fact that part of the site is within the River Redlake Wildlife Site, consequently development of this element of the site and an appropriate buffer is likely to lead to a significant adverse effect on one or more locally designated site(s) and as such is contrary to policy, therefore this part of the site is unsuitable for development. Additionally, part of the site is also within Flood Zones 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. Suitability of the site for open market residential development is therefore subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p> <p>Bucknell is located within the River Clun catchment. To protect the integrity of the river Clun Special Area of Conservation and to comply with the Habitats Regulations, development within the catchment of the river Clun will only be permitted if it can demonstrate either nutrient neutrality or nutrient betterment.</p> <p>Outline Planning Application (21/03445/OUT) pending consideration for 8 dwellings on part of the site.</p>						0						0

Strategic Land Availability Assessment (SLAA) Site		Years 11-15: Forecasting as at 31st March 2022						Years 16+: Forecasting as at 31st March 2022

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
CLU003	Land adjacent to The Hall, Vicarage Road, Clun	<p>The site is within the development boundary so development is acceptable in policy terms, subject to material considerations such as the ability to suitably manage any physical, heritage or environmental constraints present. For instance the site is in a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site’s suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is densely wooded, which will require due consideration. The site is also within 300m of a Scheduled Monument and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is in the Shropshire Hills AONB, therefore major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.</p>	<p>The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>
BRD012	Land off Stourbridge Road, Bridgnorth	<p>The site is considered developable subject to appropriate management of any physical, heritage and environmental constraints. For instance the ability to provide access is subject to Highway Officer advice. The site contains and is within proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within proximity of a Conservation and Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.</p>	<p>The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is not currently available but will become so in the future; that there is a willing landowner/developer; and no legal or ownership problems which could limit development beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.</p>	<p>For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>
DNP005	Land north-west of South Road, Ditton Priors	<p>The site is within the development boundary so development is acceptable in policy terms, subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance these include the presence of a Listed Building within the site the site's location in a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site’s suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in the Shropshire Hills AONB, therefore major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)				
Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
BRO034	Adj. Brook Cottage, 4 Bridge Rd, Broseley	<p>Within development boundary so site suitable for development. Discussion will be needed with highway authority about vehicle access and Coal Authority regarding land conditions. The site is within 500m of an Ancient Woodland site. Development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 250m of 3 Local Wildlife Sites, so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 30m of a Veteran Tree/ tree protected by a Tree Preservation Order so development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is located within a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is within proximity of a World Heritage Site and a number of listed buildings so development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.</p>	<p>The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>
CST001 and CST002	Church Stretton Car Sales and Crown Carpets, Burway Road, Church Stretton	<p>The site is within the development boundary of the settlement so residential development is acceptable in principle subject to material considerations. development in relation to this matter, subject to acceptable safeguarding. The site is within a Conservation Area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is located within the Shropshire Hills AONB. Major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is also within proximity of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Furthermore the site is within proximity of ancient woodland, therefore development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within proximity of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.</p>	<p>Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.</p>	<p>For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
CST008	Land at Woodbank House, Church Stretton	The site is within the Church Stretton development boundary so the principle of development is accepted. The site is located within the Shropshire Hills AONB. Major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. However, as the site is also within a settlement development boundary it is considered suitable for development in principle. The site is within 500m of an Ancient Woodland site. Development is subject to an assessment of impact on this natural asset. Where deterioration or loss is likely, national policy states that the need for, and benefits of, the development should clearly outweigh the loss if development is to be acceptable. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 250m of a Wildlife Site. Development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is adjacent to a Conservation Area. Development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
CRA001	Abattoir site, Craven Arms	A small part of the site are within Flood Zones 2 and/or 3. The area of the site outside this zone has potential for residential development (following the relocation of the existing abattoir) as it is located within the Craven Arms settlement boundary. This potential is subject to the appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 300m of a Conservation Area and several Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was represented during the SAMDev Site Allocations process for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future. Specifically there is a stated aspiration within the current Development Plan to relocate the abattoir to the proposed Newington Food Park. This relocation will allow the redevelopment of the existing site, which will act as a catalyst for the redevelopment of the wider area.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
CRA029	Garage Corvedale Rd, Craven Arms	The site is a brownfield site within the development boundary. Suitable in principle for residential development. A positively designed scheme could enhance the site and its setting, which is a gateway into the town. Therefore the site is suitable subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is brownfield and in use as a garage, therefore there are potential contamination issues. The site is also in proximity of a conservation area and listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
HNN021	Off Netherton Lane, Highley	The site is located within the Highley development boundary. As such the principle of residential development on the site is established. Suitability is subject to appropriate management of the physical, heritage and environmental constraints. For instance part of the site was subject to previous quarrying and subsequent landfill uses, this will require due consideration. The site is adjacent to existing commercial units. The relationship between these units and any residential development on this site will require due consideration. The site contains and is in proximity of trees subject to TPO protection, development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. The site is also in proximity of a conservation area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.
LUD005	21 New Street, Ludlow	The site is located within the Ludlow development boundary and is considered to represent a suitable location for residential development, subject to appropriate management of any physical, heritage and environmental constraints. For instance, the site is located within proximity of one or more listed buildings and a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.

Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
CST008	Land at Woodbank House, Church Stretton	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						6						0
CRA001	Abattoir site, Craven Arms	The site is considered suitable; available (following the relocation of the existing abattoir); achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate assessment and management of the impact on physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Such constraints include: Flood Zones 2 and/or 3; proximity to a Conservation Area and to several Listed Buildings. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						26
CRA029	Garage Corvedale Rd, Craven Arms	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						8
HNN021	Off Netherton Lane, Highley	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Approximately 40% of the site granted Planning Permission (17/05813/FUL) for a business unit. As such site capacity has been reduced.						0						10
LUD005	21 New Street, Ludlow	The site is considered suitable; likely to become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						5						0

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
LUD022	Morris Bufton Galdeford, Ludlow	<p>The site is within the Ludlow development boundary so the principle of development is accepted subject to management of any physical, heritage and environmental constraints. These include consideration of any loss of employment. The site is in proximity of a Scheduled Monument, Conservation Area and one or more Listed Buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within 500m of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. If the consent for a retail unit on part of the site is implemented, this will need to be excluded from the developable area.</p>	<p>Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.</p>	<p>For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>
ONY005	Land at the Quarry	<p>The site is located adjacent to an existing Community Hub, however within Onibury open market residential development is limited to infilling, groups of houses and conversions on suitable sites within the village. The housing guideline for Onibury is around 25 dwellings. As a former quarry, the sites topography may be challenging, contamination may be present and ground investigations are likely to be required. The site is also located within the AONB, therefore any major development of this site is subject to an assessment of impact on the special qualities of this AONB. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the public interest of the development outweighs the harm, in line with paragraph 116 of NPPF. This site’s suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of a conservation area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The ability to provide an appropriate access is subject to highway approval. Subject to these factors, a suitably sized scheme, appropriate consideration of the identified housing guideline for the settlement, and any other material considerations, including any other physical, heritage and environmental constraints present, the site may currently be suitable for development. However, Onibury has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. As such under this policy approach open market residential development on the site would be contrary to policy.</p>	<p>The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>
HHH003	Divisional Surveyors Office & Depot, Hearne Lane, Hodnet	<p>The site is within the development boundary so the principle of development is accepted subject to material considerations and suitable management of any physical, heritage or environmental constraints present. For instance, the site is located within a Conservation Area and its proximity to a Scheduled Monument, a Registered Park or Garden and one or more Listed Buildings, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site’s suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.</p>	<p>The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
LUD022	Morris Bufton Galdeford, Ludlow	The site is considered viable and achievable (subject to any further necessary viability assessment). Its availability is unknown. Where necessary, this will be informed by further discussions with landowners and/or their representatives. Furthermore, the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site is currently suitable for development as it is located within the development boundary where the principle of development is accepted subject to management of any physical, heritage and environmental constraints. These include the implications of any loss of employment; and the site's proximity to a SSSI, a Scheduled Monument, a Conservation Area and several Listed Buildings. Additionally, If the consent for a retail unit on part of the site is implemented, this will need to be excluded from the developable area.						0						41
ONY005	Land at the Quarry	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Particularly the fact the site is located within the AONB, site topography/stability, appropriate development size/design/layout and consideration of the settlement guideline. However, Onibury has not been identified as a proposed Strategic/Principal/Key Centre or Community Hub within the Local Plan Review and the site size threshold for inclusion within the SLAA is likely to exceed those which are considered appropriate within any future Community Clusters proposed as part of the Local Plan Review. As such under this policy approach open market residential development on the site would be contrary to policy in the future.						3						0
HHH003	Divisional Surveyors Office & Depot, Hearne Lane, Hodnet	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). furthermore, the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. The site is also suitable in principle for open market residential development as it is within the development boundary, subject to material considerations; suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment.						9						0
MDR001	77 - 83 Shropshire Street, Market Drayton	The site is considered suitable; will likely become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						5						0

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
MDR002	Car Sales Area, Salisbury Road, Market Drayton	The site is considered suitable for residential development. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance there is a TPO adjacent to the site, therefore development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded. Thus, the site is considered suitable for development in relation to this matter, subject to these safeguarding measures being deemed acceptable. Additionally the site is located within proximity of one or more listed buildings, consequently development is subject to an assessment of impact on the significance of the setting of this heritage asset(s). Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of either a withdrawn Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
MDR003	Haulage Yard, Newcastle Road, Market Drayton	The site is considered suitable for open market residential development. Suitability is also subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 300m of a Conservation Area, accordingly the impact of any proposed development will need to be appropriately assessed and considered. Notwithstanding this there are few other constraints and the site is considered suitable for development.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
MDR004	Cricket Club, Betton Road, Market Drayton	The site falls within the development boundary of Market Drayton. As such it is a suitable location for residential development. Although the site is included within the cricket club open space, the site itself does not include any green space (it is a brownfield site) although it does include the club house, any development would therefore need to demonstrate that this facility is no longer required or include a replacement facility. Any development on the site would need to address any physical, heritage and environmental constraints present. For instance, the site is within 300m of a Conservation Area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site was subject to a series of applications for residential development in 2006 and 2008. Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
MDR026	Pet Market, Shrewsbury Road, Market Drayton	The site is considered suitable for residential development. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SKH001	Land at Rosehill Road, Stoke Heath	This brownfield site is located within proximity of an existing Community Hub, within Stoke Heath open market development will be delivered upon the allocated site together with limited infilling, groups of houses and conversions on suitable sits within Stoke Heath. This particular site has also been identified within the emerging Neighbourhood Plan as an appropriate location for residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Particularly contamination. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site.	The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site.
MUW001	Smithfield Works, Much Wenlock	Complies with current policy and is also a brownfield site. Within 500m of a SSSI so development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site boundary is also within 30m of a Tree Preservation Order. Development is subject to an assessment of impact on this protected tree in order to demonstrate how it can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Site is also within 300m of a Conservation Area and several Listed Buildings. Development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Previously submitted for consideration within the SHLAA; SAMDev Plan; and the Much Wenlock Neighbourhood Plan. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.

Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
MDR002	Car Sales Area, Salisbury Road, Market Drayton	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						5
MDR003	Haulage Yard, Newcastle Road, Market Drayton	The site is considered suitable, likely to become available, achievable; and viable (subject to any further necessary viability assessment) and appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						7
MDR004	Cricket Club, Betton Road, Market Drayton	The site is considered suitable, available, achievable; and viable (subject to any further necessary viability assessment) and appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Suitability is subject to the development including a replacement club house facility or demonstrating that this facility is no longer required as although the site is included within the cricket club open space, the site itself does not include any green space (it is a brownfield site) only the club house. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						5
MDR026	Pet Market, Shrewsbury Road, Market Drayton	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						5
SKH001	Land at Rosehill Road, Stoke Heath	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. This brownfield site is considered suitable (subject to appropriate management of any policy, physical, heritage and environmental constraints present); available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. The site has also been identified within the Stoke Upon Tern Neighbourhood Plan as an appropriate location for residential development. Planning Permission (17/04913/OUT / 20/00256/REM) granted for 1 dwelling on part of the site. It is considered the remainder of the site has capacity for 14 dwellings, as assumed within the Shropshire housing land supply assessment.						14						0
MUW001	Smithfield Works, Much Wenlock	The site is considered suitable; likely to become available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate assessment and management of impact on heritage and environmental constraints in proximity (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						17

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
KCK001	The Old Post Office, Knockin	The site is located within the development boundary for Knockin. As such development by infilling and conversions of buildings may be acceptable subject to material considerations. Knockin also represents a proposed Community Hub. Material considerations include suitable consideration and management of any physical, heritage and environmental constraints. For instance the ability of the current access to serve the redevelopment of the site is subject to highway approval. The site is within a conservation area and in proximity of a number of listed buildings and a scheduled monument, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded.	The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
OSW002	Health Centre/ Adult Training Centre, Victoria Rd, Oswestry	Suitable location subject to appropriate design and necessary assessments. Specifically the site is located within proximity of a scheduled monument, conservation area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within proximity of a number of TPO's, therefore development is subject to an assessment of impact on these protected trees in order to demonstrate how they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
OSW005	Roy Evans Garage, Oak Street, Oswestry	The site is in a suitable location for residential development, subject to appropriate assessment and management of physical, heritage and environmental factors. Specifically, the site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also in proximity of a scheduled monument; one or more listed buildings; and a registered park/garden, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has previously been submitted for inclusion within the SHLAA. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
OSW043	Welsh Border Meats, Willow Street, Oswestry	The site is located on the edge of the town centre within the Oswestry development boundary. The surrounding area contains a mix of uses including many residential properties. As such it is an appropriate location for residential development. The site is within proximity of one or more listed buildings; a conservation area; a scheduled monument; and a registered park and garden. Development is subject to an assessment of impact on the significance of the setting of these heritage assets Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of either a refused or withdrawn Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
OSW045	Autocare, King Street, Oswestry	This brownfield site is suitable for development, subject to assessment and management of identified constraints. Specifically the site is located within a conservation area. Therefore development of this site is subject to an assessment of impact on the specified asset(s). Where this shows that substantial harm to or a total loss of significance of the designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site is in proximity of one or more listed buildings and a scheduled monument. Development is therefore subject to an assessment of impact on the significance of the setting of this heritage asset(s). Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is in proximity of a wildlife site. Development is subject to an assessment of the impact on this locally designated site.. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. Thus, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been the subject of a series of lapsed Planning Permissions for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.

Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
KCK001	The Old Post Office, Knockin	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is by infilling and conversions of buildings, subject to material considerations; appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. For instance the site is located within a conservation area. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						6						0
OSW002	Health Centre/ Adult Training Centre, Victoria Rd, Oswestry	The site is considered suitable; achievable; and viable (subject to any further necessary viability assessment) for residential development. The site is considered to be not currently available, but is likely to become so. Where necessary, this will be informed by further discussions with landowners and/or their representatives. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						22
OSW005	Roy Evans Garage, Oak Street, Oswestry	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						5
OSW043	Welsh Border Meats, Willow Street, Oswestry	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						5
OSW045	Autocare, King Street, Oswestry	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the sites location within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						5

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA) Site		Years 11-15: Forecasting as at 31st March 2022						Years 16+: Forecasting as at 31st March 2022		
SLAA Site Reference	Address	2032/33	2033/34	2034/35	2035/36	2036/37	Total	2037/38	Total	Post Local Plan Period

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
OSW051	Weston Lane, Oswestry	The site is located within the Oswestry development boundary adjacent to sites allocated for housing development. Therefore open market residential development on the site is likely to be appropriate. However, the ability to provide an appropriate access into the site is subject to highway approval. Furthermore, the site is within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
PYC002	Penylan, Penygarreg Lane, Pant	Brownfield site within development boundary so suitable in principle, subject to material considerations. Material considerations include any physical, environmental or heritage constraints present. For instance the site is within 500m of a SSSI, therefore development is subject to an assessment of impact on the notified special interest features of the SSSI. Where an adverse impact is likely, there will be a need to consider whether the benefits outweigh both the harm to the special features and any broader impacts on the national network of SSSIs. The site is within 250m of a Wildlife Site, therefore development is subject to an assessment of the impact on this locally designated site.. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is within 300m of grade 2 listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been the subject of a lapsed Planning Application for a relevant use, but it is understood that there remains development interest; the site is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SMH002	Darjeeling, School Lane, St Martins	Brownfield site within development boundary. Therefore the site is considered suitable in principle for residential development. Suitability is subject to appropriate management of any physical, heritage or environmental constraints present. For instance comments will be required from highway department regarding highway access. Planning Permissions (19/02458/FUL and 21/01012/FUL) granted for 2 dwellings and 1 dwelling (post 31st March 2022) respectively on parts of the site.	The site has been the subject of a lapsed Planning Application for a relevant use (granted 2011). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future. Planning Permissions (19/02458/FUL and 21/01012/FUL) granted for 2 dwellings and 1 dwelling (post 31st March 2022) respectively on parts of the site.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Planning Permission (19/02458/FUL) granted for 2 dwellings on part of the site.
SHF004	Land to the rear of Jaspers, Shrewsbury Road, Shifnal	The site is located on the edge of the town centre of Shifnal, within its development boundary. As such it is a suitable location for open market residential development. However, this excludes a small portion of the site, along its eastern boundary which is located within flood zones 2 and/or 3. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of this/these designated heritage asset(s) is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site’s suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. Additionally the site is adjacent to a TPO, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also in proximity of a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The ability to provide an appropriate access is subject to highway approval.	This site has previously been the subject of Planning Applications (most recently refused in 2005) for the demolition of existing buildings (beyond the identified site area) and erection of 28 dwellings. Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SHF016	St Peter’s Youth Club, Bridgnorth Road, Shifnal	The site is located within the development boundary and a predominantly residential area therefore the principle of open market residential uses on the site is accepted. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is in proximity of a conservation area and several listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is not currently available but will become so in the future; that there is a willing landowner/developer; and no legal or ownership problems which could limit development beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.

Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
OSW051	Weston Lane, Oswestry	<p>The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Specifically, the ability to provide an appropriate access into the site is subject to highway approval.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p>						0						10
PYC002	Penylan, Penygarreg Lane, Pant	<p>The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p>						0						5
SMH002	Darjeeling, School Lane, St Martins	<p>The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p> <p>Planning Permissions (19/02458/FUL and 21/01012/FUL) granted for 2 dwellings and 1 dwelling (post 31st March 2022) respectively on parts of the site. These Planning Permissions have been reflected when identifying the potential remaining capacity of the site as included within the Shropshire five year housing land supply.</p>						5						0
SHF004	Land to the rear of Jaspers, Shrewsbury Road, Shifnal	<p>The site is considered likely to become available, viable and achievable. Where necessary, this will be informed by further discussions with landowners and/or their representatives; and any further necessary viability assessment work.</p> <p>The site is however considered suitable for residential development (excluding the small portion of the site located within flood zones 2 and/or 3), subject to assessment and management of the physical; environmental; or heritage constraints. Such as the ability to access the site and its location within a conservation area.</p> <p>If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on appropriate changes to policies affecting this location; suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p>						0						5
SHF016	St Peter's Youth Club, Bridgnorth Road, Shifnal	<p>The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.</p> <p>Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.</p>						0						12

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
SHF021	West of Lamledge Lane and Shifnal College and North of Shifnal Industrial Estate, Shifnal	The site is located within the Shifnal development boundary. The eastern portion of the site is unallocated. The western portion of the site is allocated for employment uses and the preference would be for employment uses upon it, however it is recognised that the wider employment allocation has been granted Planning Permission for a mixed residential and care home scheme, therefore open market residential uses on this component of the site is also likely to be appropriate. The ability to provide an appropriate access is subject to highway approval.	The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SHF027	Garage off Bradford Street, Shifnal	The site is located within the Shifnal development boundary and its frontage is within the town centre. As a result there would be an expectation that ground floor uses may be more appropriate for retail and town centre uses. Open market residential uses on upper floors would be supported. The site does have potential for open market residential on the ground floor subject to demonstration of compliance with current policy (that residential uses on the ground floor would support the regeneration of the town centre) or long term potential subject to appropriate policy changes. Suitability is also subject to and management of any physical, heritage and environmental constraints. For instance as a former garage site investigation and remediation or any contamination would be required. The site is within proximity of a conservation area and a number of listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SHF028	27 Shrewsbury Road, adjacent to St Mary’s Church, Shifnal	The site is located within the Shifnal development boundary and near the town centre, therefore the site is suitable for open market residential development subject to appropriate management of any physical, heritage and environmental constraints. For instance the ability to access the site is subject to highway approval. The site is located within a conservation area, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site’s suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also within proximity of a listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The buildings fronting onto Shrewsbury Road may have heritage value.	The site has been submitted through the ‘call for sites’ for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
BNP014	Newtown Garage, Baschurch	Site is suitable for residential development subject to brownfield remediation issues and any site contamination as a result of previous use history. The site is also contains part of a Conservation Area. Therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site’s suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. The site is also within 300m of a Listed Building. Development is subject to an assessment of impact on the significance of the setting of the listed building where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.	Site has previous permissions for residential development in 2011 and 2007 both now lapsed. The site has been the subject of a lapsed Planning Application for a relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SHR011	Land at the Elms, Belvidere, Shrewsbury	As a part brownfield and part greenfield site within the development boundary, the site is considered suitable in principle for open market residential development. However, suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the need to provide an alternative location for the Scout Group. The ability to provide an appropriate access into the site is subject to highway approval. The site is within proximity of ‘The Elms’ Grade 2 Listed Building and a Conservation Area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. The site also contains and is in proximity to TPO’s, therefore development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied by a Scout Group with 25 yr. lease so site will only become available during this time if an alternative location can be found for them (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.

Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
SHF021	West of Lamledge Lane and Shifnal College and North of Shifnal Industrial Estate, Shifnal	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment.						0						6
SHF027	Garage off Bradford Street, Shifnal	The site is considered suitable, available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development above the ground floor is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Suitability of open market residential development one the ground floor is also subject to demonstration that this would support the regeneration of the town centre. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						7
SHF028	27 Shrewsbury Road, adjacent to St Mary's Church, Shifnal	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site is located within a conservation area. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						5
BNP014	Newtown Garage, Baschurch	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically part of the site is within a Conservation Area and the site is within 300m of one or more Listed Buildings. If the assessment shows no adverse effect or suitable mitigation were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						7
SHR011	Land at the Elms, Belvidere, Shrewsbury	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically TPO's on site, impact on Grade 2 Listed Building 'The Elms' and satisfactory access. If suitable mitigation of the identified constraints were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						15

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
SHR014	Site at New Zealand House, Abbey Foregate, Shrewsbury	The portion of the site located within flood zones 2 and/or 3 is unsuitable for development. This portion of site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site is suitable for development subject to appropriate management of any physical, heritage and environmental constraints present. For instance the suitability of the access to serve the redevelopment of the site is subject to highway approval. The site is located within a Conservation Area and adjacent to a Grade 2 listed building, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached. Furthermore, the site contains and is within proximity of TPO's. Consequently development is subject to an assessment of impact on the protected tree(s) on/in proximity of the site in order to demonstrate how they can be safeguarded. The site is also within 100m of a Local Nature Reserve so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm.	Shropshire Council Officers understand that the site is likely to become available for the relevant use, but the site is currently occupied (the user has not confirmed that they can/will vacate the site to allow its development, but their lease will expire at a specified point in the future or there is confidence that they will vacate the site) and/or it is subject to some other form of constraint (time limited or can be removed). It is however understood that it is owned by a willing landowner and/or developer; and that there are no legal or ownership problems which could limit development, beyond those which mean the site is not immediately available. Therefore information gathered for the purposes of this study suggests that there is confidence in the site becoming available for development in the future.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SHR015	Land at Whitehall, Shrewsbury	Site is located in a longstanding established residential area and would be suitable for open market residential development subject to assessment and management of physical, environmental and/or heritage constraints. For instance the site contains and is in proximity of a listed buildings; it is also located in a conservation area; and proximity of a scheduled monument, therefore development of this site is subject to a heritage impact assessment. Where this shows that substantial harm to or a total loss of significance of the designated heritage asset is likely then development needs to meet the tests set out in paragraph 133 of the NPPF. If less than substantial harm is likely, then this should be weighed against the public benefits of development. This site's suitability is therefore dependent on the necessary assessment(s) being undertaken and the conclusions reached.	Site is currently occupied as a medical / office facility with associated car parking. However, the site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SHR016	Shrewsbury Training and Development Centre, Racecourse Crescent, Shrewsbury	Site is located in a longstanding established residential area and would be suitable for open market residential development subject to assessment and management of physical, environmental and/or heritage constraints. For instance the ability to provide an appropriate access is subject to highway approval. The site is also within 300m of conservation area and 100m of Grade 2 listed building, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. Full Planning Permission (22/00025/FUL) granted post 31st March 2022 for 13 affordable dwellings on the site. The applicant is a developer (STAR Housing).	The site has been submitted through the 'call for sites' for a relevant use, but this submission does not specify that the site is available for this form of development and subsequent investigations have not been able to clarify whether the site is available for this form of development. Therefore information gathered for the purpose of this study is unable to confirm that the site is available for this form of development. Full Planning Permission (22/00025/FUL) granted post 31st March 2022 for 13 affordable dwellings on the site. The applicant is a developer (STAR Housing).	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken. Full Planning Permission (22/00025/FUL) granted post 31st March 2022 for 13 affordable dwellings on the site. The applicant is a developer (STAR Housing).
SHR165	Land to north-west of Hazeldine Way, Shrewsbury	Greenfield site within development boundary, so no in principle restrictions. However, approximately 66% of the site is located within flood zone 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be suitable for development subject to confirmation of the ability to provide an appropriate access to and into the site (which is currently unclear), any proposed access is subject to highway approval. Suitability is also subject to appropriate management of any physical, heritage and environmental constraints present. For instance, the site is adjacent to Reabrook Valley Local Nature Reserve, therefore development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. The site is also in proximity of a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	The site has been promoted during the 2017 Call for Sites for residential development. For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.
SHR211	Land at Hollydene, Shrewsbury	The site is located within the development boundary. Therefore open market residential development is suitable in principle. Suitability is subject to appropriate management of any physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access is subject to highway approval. The site is in proximity to trees subject to TPO protection, therefore development is subject to an assessment of impact on this/these protected tree(s) in order to demonstrate how it/they can be safeguarded.	The site has been submitted through the 'call for sites' for a relevant use, and this submission confirms that the site is available now; that there is a willing landowner/developer; and no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.	For a scheme to be 'viable' it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer. Shropshire's geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability. Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.

Strategic Land Availability Assessment (SLAA) Site		Summary	Years 1-5: Forecasting as at 31st March 2022						Years 6-10: Forecasting as at 31st March 2022					
SLAA Site Reference	Address		2022/23	2023/24	2024/25	2025/26	2026/27	Total	2027/28	2028/29	2029/30	2030/31	2031/32	Total
SHR014	Site at New Zealand House, Abbey Foregate, Shrewsbury	The site is considered viable and achievable (subject to any further necessary viability assessment). It is not currently considered to be available, but is it considered that it is likely to become available in the future. Where necessary, this will be informed by further discussions with landowners; their representatives; and any further necessary viability assessment work. The element of the site located outside flood zones 2 and/or 3 is considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically heritage assists and satisfactory access. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. The element of the site located in flood zones 2 and/or 3 would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						14
SHR015	Land at Whitehall, Shrewsbury	The site is considered likely to become available; achievable; and viable (subject to any further necessary viability assessment). The site is also considered suitable for development subject to appropriate assessment and management of any impact on the physical; environmental; or heritage constraints to the site. Specifically the site contains listed buildings, is located in a conservation area and proximity of other heritage assets. If suitable mitigation of this identified constraint were possible, the sites development potential would also depend on suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						0						30
SHR016	Shrewsbury Training and Development Centre, Racecourse Crescent, Shrewsbury	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for open market residential development. Suitability of the site for open market residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. Full Planning Permission (22/00025/FUL) granted post 31st March 2022 for 13 affordable dwellings on the site. The applicant is a developer (STAR Housing).						13						0
SHR165	Land to north-west of Hazeldine Way, Shrewsbury	The site is considered available; achievable; and viable (subject to any further necessary viability assessment). Approximately 66% of the site is located within flood zone 2 and/or 3, therefore this element of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site may be suitable for development subject to confirmation of the ability to provide an appropriate access to and into the site (which is currently unclear), any proposed access is subject to highway approval. Suitability is also subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers); and where appropriate the outcome of a visual impact and landscape sensitivity assessment.						0						10
SHR211	Land at Hollydene, Shrewsbury	The site is considered suitable; available; achievable; and viable (subject to any further necessary viability assessment) for residential development. Suitability of the site for residential development is subject to appropriate management of the physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and where appropriate the outcome of a visual impact and landscape sensitivity assessment. Furthermore the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site.						5						9

Appendix G: Sites from the Strategic Land Availability Assessment (SLAA)

Strategic Land Availability Assessment (SLAA) Site				
SLAA Site Reference	Address	Suitability	Availability	Achievability/Viability
SHR217	The Pitch and Putt, Shrewsbury	<p>The site is located within the development boundary. However approximately 50% of the site is identified as an outdoor sports facility. Therefore this area of the site is not appropriate for development unless an assessment has been undertaken which clearly indicates that the open space or facility is surplus to requirements or the loss would be replaced by equivalent or better provision. The remainder of the site is suitable in principle for open market residential development subject to material considerations and management of any physical, heritage and environmental constraints present. For instance the suitability of the access to serve alternative uses of the site will require highways approval. The site is in proximity of a conservation area, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development.</p>	<p>Shropshire Council Officers have confidence that the site is owned by a willing landowner and/or developer; it is available to develop now; there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p> <p>A Planning Application (22/03877/FUL) is pending consideration for a mixed use development on the open space component of the site, this includes a residential care home.</p>	<p>For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability.</p> <p>Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p> <p>A Planning Application (22/03877/FUL) is pending consideration for a mixed use development on the open space component of the site, this includes a residential care home.</p>
WEM018	Land behind 18-34 Aston Road, Wem	<p>Suitable location subject to appropriate design and management of the physical, heritage and environmental constraints present. For instance the ability to provide an appropriate access to and into the site is subject to highway approval. Access to services and facilities in the town may be constrained by highway and traffic issues associated with the rail crossing, this will require due consideration. The site is within proximity of a conservation Area and one or more listed buildings, therefore development is subject to an assessment of impact on the significance of the setting of these heritage assets. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.</p>	<p>The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development. Therefore information gathered for the purposes of this study suggests that there is confidence in the site being available and will come forward for development.</p>	<p>For a scheme to be ‘viable’ it must make financial sense to both the developer and the landowner, within the constraints imposed by the market; planning policies; and any required infrastructure obligations. It is within this context that the NPPF defines a viable scheme as one that provides competitive returns to a willing landowner and developer.</p> <p>Shropshire’s geographical location and rural character make it a desirable place to live. Like many other Counties, Shropshire has a diverse housing market. However, despite this within Shropshire residential development is generally considered viable, unless there are site specific issues which impact upon viability.</p> <p>Consequently, residential development upon any site is generally considered achievable and viable unless there are site specific issues evident. However, to support this conclusion on the achievability and viability of development, a separate viability assessment will be undertaken.</p>
WHT005	Land at Sherrymill Hill, Whitchurch	<p>The site is located within the development boundary, and so residential development is in line with policy. However, approximately 40% of the site is located within flood zone 2, therefore this part of the site would only be considered appropriate if it is considered necessary (through the sequential and/or exception test); the risk can be mitigated; and it will not increase risk elsewhere. The remainder of the site is considered suitable for development, subject to appropriate management of any physical, heritage and environmental constraints present. For instance the site is within 250m of a Wildlife Site, and so development is subject to an assessment of the impact on this locally designated site. Where this assessment shows a significant and unavoidable adverse effect, there will be a need to consider whether the social and economic benefits of development outweigh the harm. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is also within 30m of multiple Veteran Trees/ trees protected by a Tree Preservation Order. Development is subject to an assessment of impact on these protected trees in order to demonstrate how they can be safeguarded. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding. The site is within 300m of a Conservation Zone. Development is subject to an assessment of impact on the significance of the setting of this heritage asset. Where this shows that substantial harm or a total loss of significance is likely then development must meet a number of tests set out in national policy. If less than substantial harm is likely, then this should be weighed against the public benefits of development. However, the site is considered suitable for development in relation to this matter, subject to acceptable safeguarding.</p>	<p>The site was represented during the SAMDev Site Allocations process for a relevant use, and it is understood that it is owned by a willing landowner and/or developer; it is available to develop now; and there are no legal or ownership problems which could limit development.
