Key points

1 The land was rejected for development by Government Inspector in the North Shropshire Local Plan 2000-2011. The reasons for rejection are still relevant.

2 The sewers and surface water drains are at their limit and cannot cope with further development. There will be an increased risk of flooding and inability to deal with sewage from the additional dwellings.

3 there is insufficient infrastructure present to support the increase population this development would create in particular schools and doctors

4 A single access road is proposed which while it meets highways standards, due to its gradient is not usable during periods of snow.

Key points suggestions

1 None development should not take place

4 An alternative or second major access should be identified and integrated into the plan
